Abbotsford Personals

Donations of food or clothing will be gratefully received for the Royal Purple Christmas Cheer fund by Mrs. Atkins at the Hotel Atangard.

Miss Elsie Stady, nurse-in-training at the Vancouver General hospital visited her parents here at the weekend.

Local Oddfellows plan to attend a session of Chilliwack lodge on Dec. 10, when a gavel, now in possession of the local lodge will be turned over to Garden City Oddfellows. Noble Grand Fred V. Holtsbaum was tendered this gavel recently by representatives of Fraser Valley Travelling Gavel Association, over 100 Oddfellows, representing five lodges, witnessing the presentation.

Contractor McDonald reports the school building at Boston Bar nearing completion. He is also building a barn with Gothic roof for W. Fadden, a store at Evan Thomas for A. Lee, a Home Oil gas station for W. Greeno and a house for J. Trento, all of these buildings being on Sumas Prairie.

Mr. Frank Lekies of Abbotsford is taking treatment in the local hospital.

Matsqui Personals

Mrs. J. W. Westlin entertained at a jolly party on Saturday evening in honor of the Misses Howem and Johansson of Lawrence, Wash. Those present were: Mr. and Mrs. F. Hansen, Mr. and Mrs. G. Stewart, Mr. and Mrs. O. Hogen, Mr. and Mrs. J. Kempf, Mr. Joe Nordine, Mr. Evert Westlin, Mr. and Mrs. T. Jacobson, Mr. and Mrs. Hurum, Mr. and Mrs. O. Sorenson, Mr. and Mrs. Holmberg, Mr. and Mrs. J. Rossland, Miss H. Kempf, Mr. Myhre, Mr. E. Alversen, Mr. A. Alversen, Mr. H. Hansen and Mr. V. Hanson.

Messrs M. Anderson, Roy Machell, and Frank Beharrell returned from their annual shooting trip on Friday, bringing home four deer.

Miss Stella Hurum spent the weekend at her home here.

A school concert assisted by adult talent will be held in the Ridgedale community hall on Friday, December 6, at 8 p.m. A sale of work by the Community club and also a sale of fancy work done by school pupils will take place, which will be in aid of school fund. Refreshments will be served.

Closing of the trout season on Saturday was marked by scores of fine catches by local fishermen, the Fraser, Vedder, Sumas and Clifton streams yielding some fine specimens, weighing up to three pounds.

A special meeting of Matsqui Ratepayers Association is to be held in Matsqui hall tonight (Wednesday).

Matsqui headed the list of Circuit II B.C. rural fairs this year (21 in number), but did not hold leadership over the entire province, 64 fairs of five circuits, as last year.

Ridgedale school proficiency list for November:—Grade 1 A.—Bobby Adams, Stanley Smith. Grade 1 B.—Wallace Machell, Walter Swanson. Grade 1 C.—Frieda Edmondson, Reggie Mundy. Grade 1 D.—Eva Krause, John Swanson. Grade 1 E.—Gordon Adams, Joseph Hall. Grade 1 F.—Erny Emans, Doris Swanson.

Peardonville

The dance in Peardonville hall turned out so successfully that another will be held on December 14. Mrs. Nelson of Vancouver was the guest of Mr. and Mrs. Peardon on Sunday.

Mr. F. C. Evans is leading in the Royal Standard laying contest. Mrs. G. W. Taylor has completed decorating and installing modern improvements in her home.

Mr. and Mrs. Peardon are having their home redecorated.

Even the highway is taking on a holiday appearance. Messrs Tracy, Stafford and Gedhart having finished cutting the brush from the roadside.

Mrs. Lehr returned from Vancouver on Saturday, the doctors reporting her husband's operation successful and the patient well out of danger.

A nice sum of money was realized for the church from the sale of work on Saturday, which was held by the ladies of Poplar. The C. G. I. T. concert was also a very successful affair.

Mr. and Mrs. Albert Welch and family from Vedder Crossing visited at Peardonville on Sunday.

Won Prizes At Winter Fair

Charles Turner of Kilgord made a clean sweep of Hereford cattle prizes at Vancouver winter fair, being the only exhibitor in that class.

A. C. Stewart, McKenzie road, won prizes for his wether lambs, champion lamb and reserve champion of the show pen of market lambs, pen of butcher lambs, 12 first out of 17 entries in breeding classes, five first out of six Southdown entries, in all 30 prizes.

Archibald Stewart's champion lamb was purchased by Grosvenor hotel for \$80, and Old's Market bought the reserve champion lamb for \$35. The first prize carcass lamb went to Hotel Vancouver at 50c pound, and his market lambs realized the record price of \$13 each for 21 head. Unusual competition developed this year from three Oregon flocks and many B. C. exhibitors.

Other local winners in sheep were Chas. Turner, R. C. Silbald, J. A. Higginson, G. H. Heller (all firsts in Suffolk and two seconds), and Albert Smythe (five prizes from five entries).

Early oat prizes were won by C. M. Menzies and F. Beltrame, Upper Sumas. Field peas and flax prizes by Jack Kennedy, Kilgord.

The B. C. E. passenger train arriving in Abbotsford at 3.50 p.m. has been cancelled because of the power situation, and mail now arrives on the 5 p.m. milk train.

It took four days to get the party

Working persistently on a telephone call from New Westminster to Vancouver, recently, it took operators four days to find the party wanted, but they didn't give up until the call was put through.

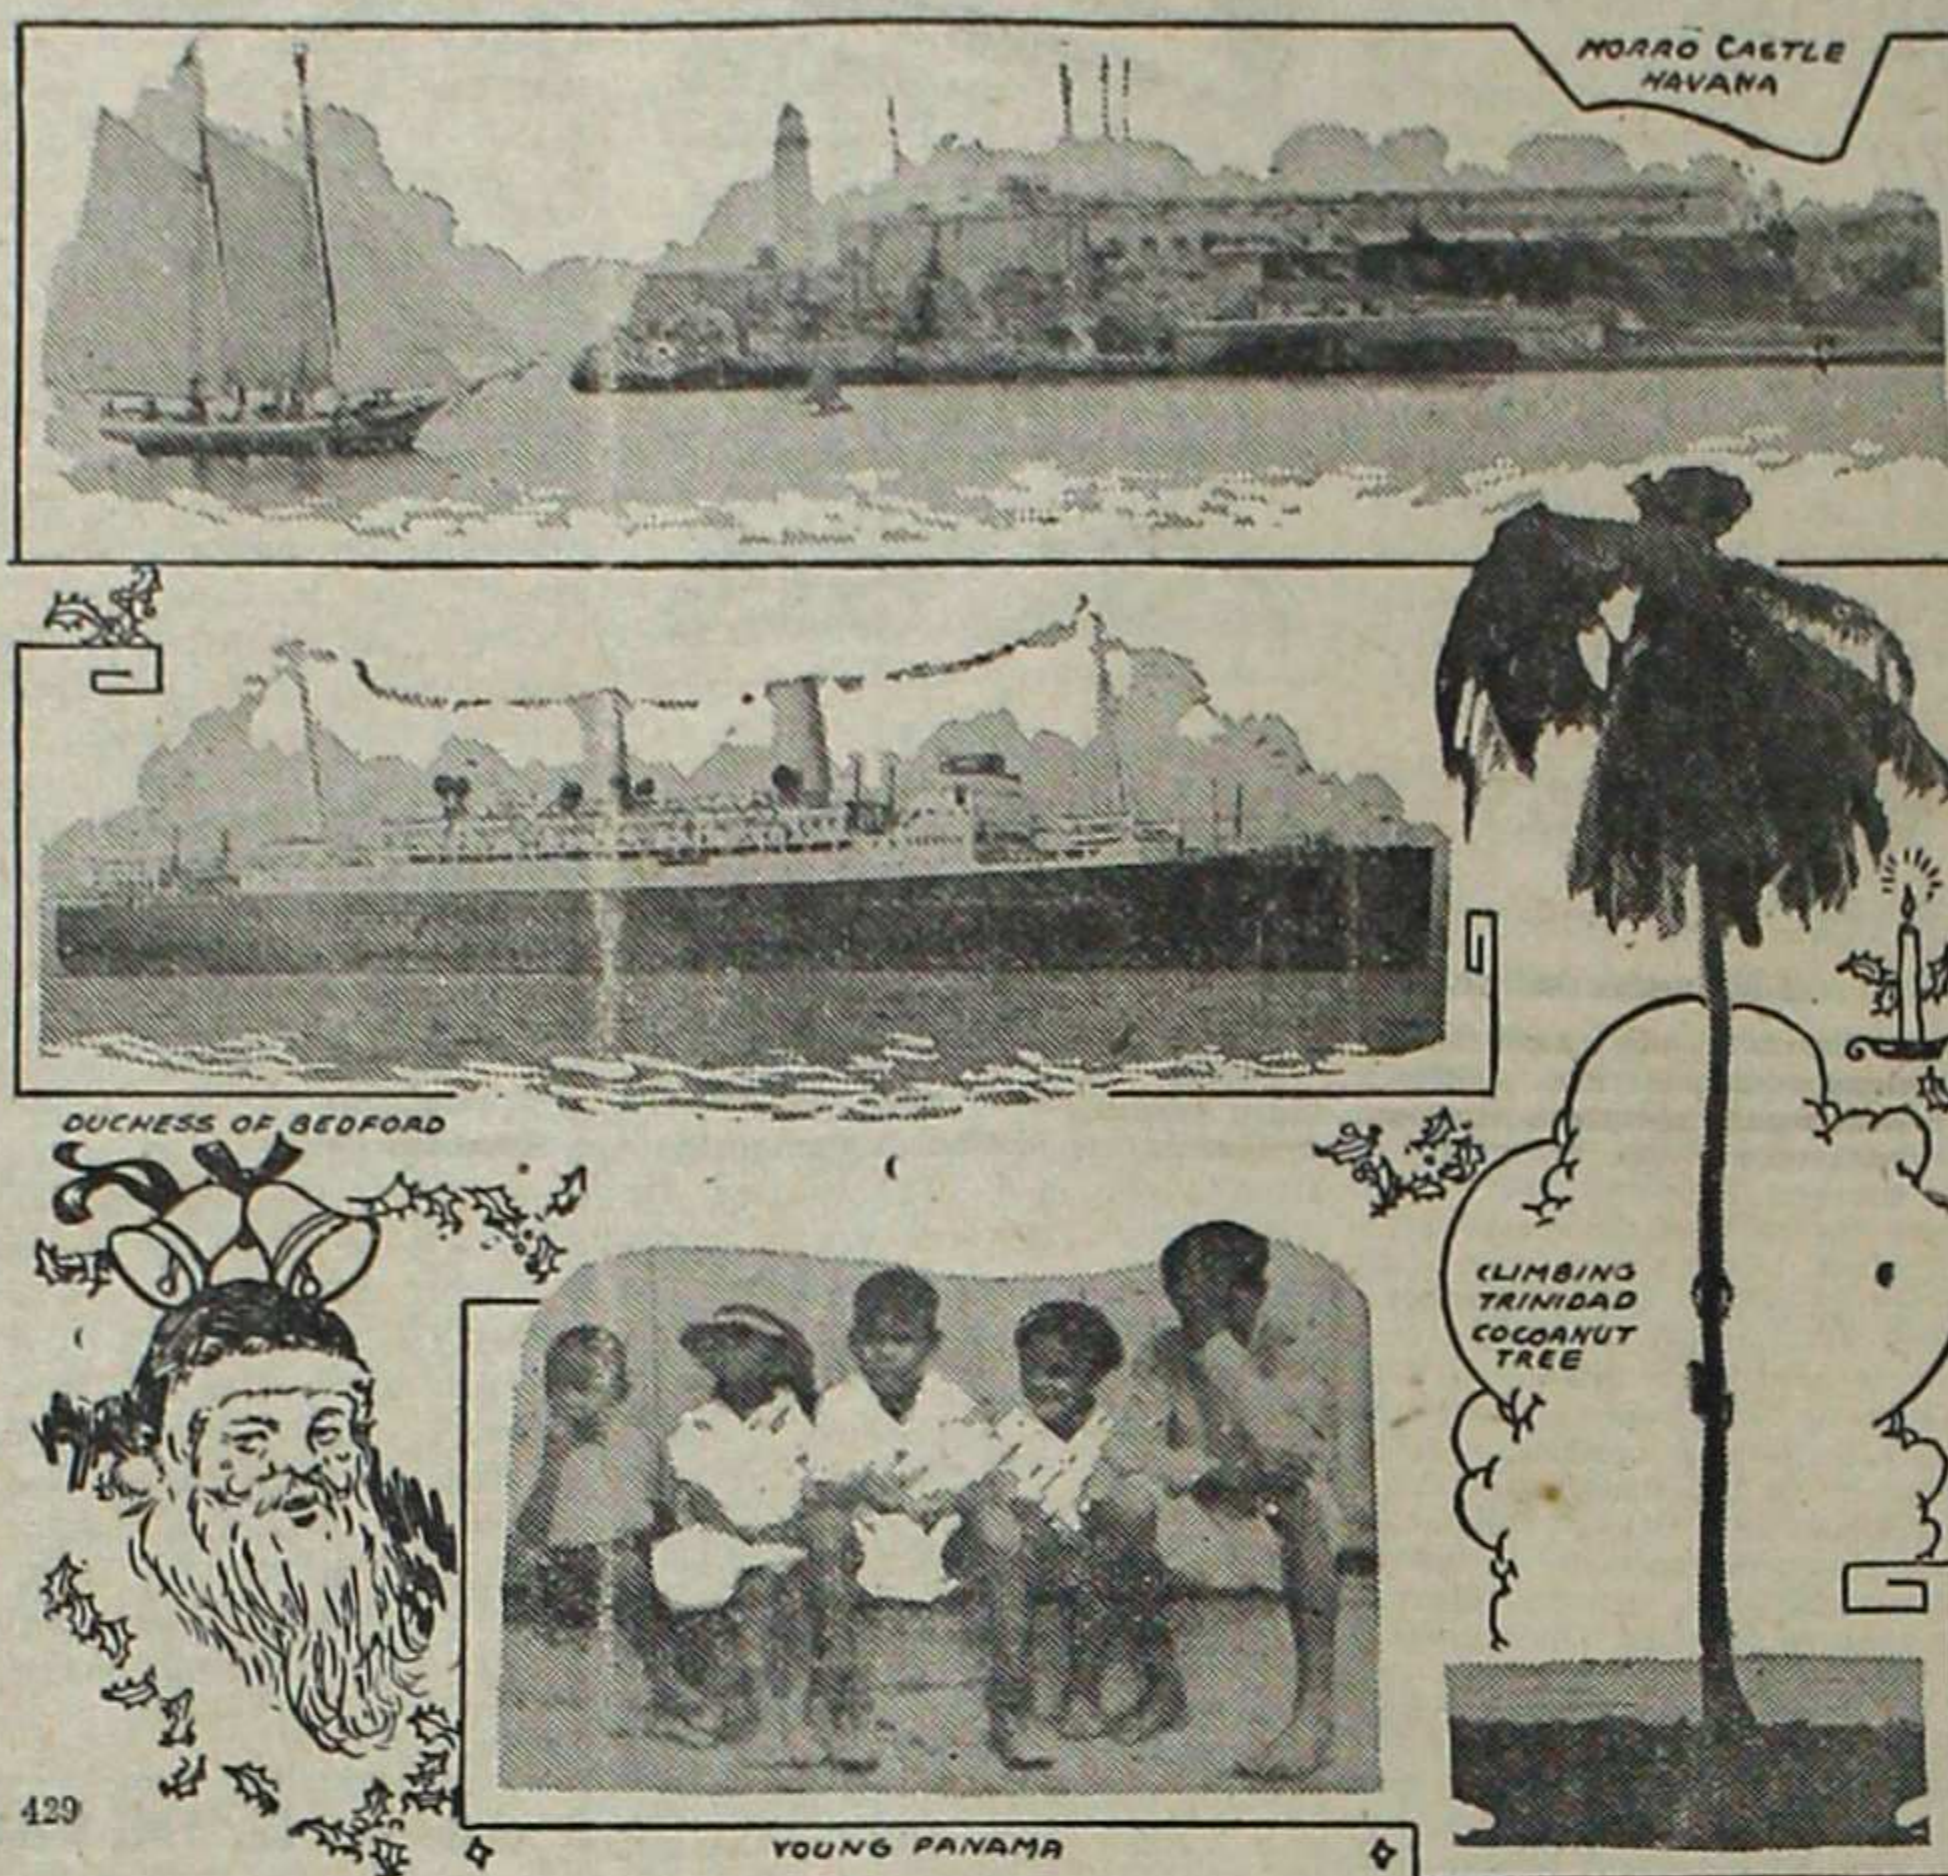

The call was for a man who maintains an office in Vancouver, but who does not visit that office daily. Connection was finally made with him at his New Westminster residence, and as it then became a "local" call, from one party in New Westminster to another, the telephone company did not derive a cent of revenue for the four days' work.

Ahoy For a Merry Christmas on the Bounding Main!

"At Christmas play and make good cheer,
For Christmas comes but once a year."
—Thomas Tusser, 16th Century.

Many and varied are the circumstances under which we moderns must spend the joyous Yuletide season, with its holly, mistletoe and gifts. Time was when Christmas Eve signified happy family gatherings at some big country house or fine old city mansion, but times change, and now most of us must alter our customs accordingly. The modern city apartment and small country cottage preclude large gatherings, but it is still possible for big families to be

together at Christmas time, for the Canadian Pacific Steamships has detailed the 20,000-ton S. S. Duchess of Bedford to make a 16-day Christmas-New Year's cruise to the West Indies, leaving New York December 23, 1929. Thus families can not only be together when the Christmas bells ring out but they will find themselves en route to a warmer climate—the storied Caribbean Sea—famed for its tales of pirates and plunder in days of yore.

Incidentally, none of the hallowed traditions connected with the holiday season are forgotten, once the ship gets under way. Her public halls and rooms are tastefully

decorated with greens; poinsettias and other appropriate plants are everywhere, and the ship's company seems imbued with the spirit of "Peace on earth—goodwill to men." Masquerade parties, big open fireplaces and Christmas trees complete the picture. Holiday voyagers aboard the "Duchess" will visit Havana, Cuba, the Paris of the New World; Kingston, Jamaica, at one time headquarters of notorious buccaners; Cristobal, Panama, formerly on the highway of Spanish treasure trains, now the site of the greatest canal in the world, and enchanting Nassau, in the Bahamas, returning to New York January 8, 1930.

"United Farmers of Canada" organ of the farmers organization, makes a suggestion, relative to Sumas lands, that they be sold direct to farmers at the price of \$50 an acre, and 1,700 acres "worthless" lands donated to any person who would pay taxes and maintenance charges. Adoption of such a plan, estimates show, would result in a profit of \$89,000 to the government.

Last week an item was turned in to the News in which Mr. Ware, of Abbotsford school staff was referred to as "principal". This is an error. Miss Stenerson is principal of Abbotsford public school.

Abbotsford Seniors Win Over Chilliwack

Last Friday night the Senior "C" team of the local basketball club journeyed to Chilliwack to take on the representatives of that city. The local teams finished on the long end of a 27 to 9 score after 40 minutes of hectic basketball. The game was clean all through, very few fouls being called. At the end of the first half Abbotsford was leading 10 to 4, and it looked as if the second half would be as close, but although the game was no less tight both teams scored a greater percentage of their shots. The opposing forwards got very few shots at the basket account, the close back-checking of the Abbotsford forwards and the excellent defensive work of the guards. For the winners Marley was high man with ten points, pressed by C. McKinnon with 8. It would not be right to pick out an individual star as the whole team played great basketball from whistle to whistle. Lineup:—Chilliwack: Nevard, Semple, 2 Halpenny, Knight 6, Henderson, McKee and Porter 1. Abbotsford: C. McKinnon 8, Haddrell 4, H. MacKinnon, Marley 10, Grant and Jackson 5.

Shipping Christmas Trees

Mr. Williams of Poplar is shipping two carloads of Christmas trees to Salt Lake City. The Mann trucks are hauling them to Abbotsford for loading.

The Christmas tree business is a big one, and is growing. Last year over seven million trees were used on this continent, about one fifth of this quantity going into Canadian cities. Since early September buyers from the U.S. have been busy in Canada, the largest contracts being placed in British Columbia and New Brunswick. Fir trees and black spruce are preferred by buyers, and must be of perfect form, pasture land being the best place to grow them. White spruce is undesirable because of its odor. The trees coming from Poplar and Peardonville sections are desirable in shape and species, and are cut from logged-over lands.

Clayburn School

Clayburn school proficiency list for November:—Grade 7—Charlie Gough, Charlotte Scott. Grade 6—Nels Sandberg; Helen Thompson and Walter Grohnert (equal). Grade 5—Gwendolyn Peachy, Frances Wilson. Grade 4—Emily Lapinsky, Terry Power. Grade 3—Mike Happy, Paul Scott. Grade 2 A.—Rune Sandberg, Muriel Lapinsky. Grade 2 B.—Ada Venturin, Jack Thompson. Grade 1—Mary Trimmell, Gunnel Sandberg, Tetreault, Tom McPhail, Winnie Harris, Cora Vander Hoek. Grade 1 A.—Glendon Stafford, Gloria Parberry, Gail Kenney. Grade 1 B.—Ern Egri, Shirley Stewart and Winnie Smith (equal), Foster Hall.

Canada Among the Nations

Canadians of all classes can hardly fail to feel a thrilling pride in the rapid strides forward made by their Dominion in the realm of international affairs. Since that fateful day in 1914, when the world was plunged into war, and Canada at once, and without the slightest hesitation, took its place in the front rank of the Allied hosts, the growth of this country in world estimation and influence, has been one of the remarkable features of the international situation.

Hardly a year has passed without witnessing some new advance step taken, or some noteworthy achievement added to the record, revealing Canada's new and higher status in the councils of the nations.

Concise, but eloquently, Sir Robert Borden outlined the Dominion's growth in international stature within the short space of the last two years in a memorandum prepared and submitted by him to the Institute of Pacific Relations now in session at Kyoto, Japan. Since 1927, when the Institute last assembled, Canada had adhered to the multilateral pact for the renunciation of war, has given adherence to the optional clause in the statutes of the Permanent Court of International Justice, has exchanged ministers with France and Japan.

Canada, too, has aligned itself wholeheartedly with Premier Ramsay MacDonald and President Hoover in their fine effort to promote mutual understanding and goodwill between all sections of the English-speaking world, thus paving the way for a larger measure of world disarmament, and making an immensely important advance toward the goal of permanent world peace.

Nor has Canada confined its efforts to the signing of treaties and the making of gestures. When the unfortunate incident of the "Im Alone" arose—a happening which in days gone by might have precipitated almost immediate war, and certainly a feeling of hostility containing the seeds of future trouble, Canada kept cool, and through the medium of diplomatic correspondence between Ottawa and Washington, a basis of arbitration was quickly and mutually arranged to the satisfaction of both nations. Speaking of this correspondence, Sir Robert says:

"The diplomatic correspondence on the subject between Canada and the United States is admirable in tone, and the questions of fact and law presented are set out lucidly and temperately on each side."

In the Assembly and Council of the League of Nations, Canada's voice is always heard in support of all measures calculated to make for peace. This Dominion is a real leader at Geneva in all efforts to promote international understanding and goodwill, and in the devising of ways and means to remove causes of suspicion and irritation.

Co-incident with the rise of Canada as a factor in international affairs, the foreign trade of the Dominion has increased by leaps and bounds until now this country can boast of the second largest world trade per head of population. Canada's ministers at Washington, Paris and Tokyo, are reinforced in this work of creating international goodwill and prestige for Canada by a large and steadily increasing number of trade commissioners in all parts of the globe.

Canada's strong position can be made stronger through the united sympathy and effort of the Canadian people. Sir Robert Borden, while voicing unqualified praise of the anti-war pact, declared that the peace of the world cannot be secured by treaties alone, nor can it be maintained by force. The same foundation which assures ordered liberty and justice in a modern civilized state must be created on an international scale if peace is to endure.

The education and idealism of the people, their inherited respect for law, and their determination to maintain order and justice against crime and lawlessness," Sir Robert said, "are the real foundations upon which stable government rests. In the world there must be an international public opinion upon which will be established between the nations the enthronement of public right and justice."

Canada, no less than other countries, has everything to gain through the development of such an international public opinion. Only by the maintenance of peace can Canada's great foreign trade continue to prosper and grow. The development of an international public opinion must begin within each national unit and spread through the whole body of humanity.

Canada has that international viewpoint. It is growing stronger, and every true Canadian will exert himself or herself to foster it. It is one of the greatest things in the nation and in the world today.

Solved Intricate Problem

Sir Alfred Ewing Was In Charge Of "Room 40" During Dark Days Of War

Sir J. Alfred Ewing, who, during the World War, was the genius of "Room 40" of the British Admiralty, has just retired as Principal of Edinburgh University, in Scotland, and in private life will do research work. "Room 40" was the room which dealt with the solving of the enemy's wireless messages in code, which were intercepted by secret listening stations on the east coast of England. Sir Alfred was in sole charge, and it was due to his skill that the Allies knew of the enemy's plans before the Battle of Jutland.

Count Ferdinand von Zeppelin, noted inventor of dirigibles, was an officer in the balloon corps of the United States Army during the Civil War.

The Union of South Africa, in 1921, had a white population of 1,500,000 against 5,000,000 blacks.

There are about a million square miles of islands in the sea.

Acid Stomach

Excess acid is the common cause of indigestion. It results in pain and sourness about two hours after eating. The quick corrective is an alkali which neutralizes acid. The best corrective is Phillips' Milk of Magnesia. It has remained standard with physicians in the 50 years since its invention. One spoonful of Phillips' Milk of Magnesia neutralizes instantly many times its volume in acid. It is harmless and tasteless and its action is quick. You will never rely on crude methods, never continue to suffer, when you learn how quickly, how pleasantly this premier method acts. Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any drugstore.

World's Largest Brooder House Near Vancouver

Operated On Community Plan and Accommodates 60,000 Chickens

What is said to be the largest brooder house in the world, is being operated on the Fraserview Manor farm, in Surrey district, near Vancouver. This brooder house, which is 900 feet in length, and divided into forty-four compartments, has accommodation for sixty thousand chicks. The brooder house is operated on a community plan, various settlers of the district being allotted certain compartments. Each settler is required to start with 1,000 pullets and the birds are moved from the big brooder house at the age of eight weeks.

In South America a bridge 500 feet long is held together by knots, no nails being used.

The earth is likely to be struck by a comet only once in 20,000,000 years, scientists declare.

Almost all the steel engravers in the United States work for the government turning out money.

Safer To Stand Up

Mussolini Had Amusing Experience At Theatre In Italy

You don't have to believe this, but a gentleman returned from abroad says that an American girl studying Italy went into a moving-picture theatre and suddenly realized that she was sitting just behind none other than II Duce Mussolini himself. His visit was inconspicuous, and successfully so, for no one recognized him in the half light of the cinema. He was enjoying everything hugely until, in the midst of a new scene, a portrait of himself in heroic pose was thrown on the screen. The spectators, of course, all arose, cheering wildly, all save Mussolini himself, who sat through the demonstration, fidgeting. His had been, obviously, a rather nice point—whether to stand up and risk being recognized honoring himself, or to remain modestly seated. After the excitement was over an old Italian lady who had the seat next him leaned over and said: "Signor, that's how we all feel, but it's safer to stand up."

NERVE TORTURES

A Condition From Which Both Men and Women Suffer

Hardly any condition of ill health causes more real suffering than a shattered nervous system. And often, unfortunately, but little sympathy is shown for the sufferer, from the mistaken notion that the nerves can be controlled. Men and women with nerves out of gear often become irritable and are blamed for ill temper, when it is not their fault. Their poor health is the cause. The tired, over-busy wife and mother, whose household cares have worn her thin; the breadwinner whose anxieties have worried him until he is really ill, are among the nerve sufferers who become run-down. Their nerves, like all bodily organs, need rest, red blood. In all such cases the best and simplest treatment is a course of Dr. Williams' Pink Pills, which enriches the blood and builds up the nervous system and brings good health and cheerfulness. Mrs. M. Cross, Richmond, Que., tells how this medicine ended her nervous troubles. She says: "I have suffered from nervousness and dizzy spells, and the hundred and one things which in such a condition make life a misery. The first thing I found to help me was Dr. Williams' Pink Pills. Under the use of this medicine I found my nerves grew sturdier, the dizzy spells grew less frequent, and I became brighter and more cheerful. I took the pills for some time and found that they enrich the blood, build up the nerves and are a fine medicine for both old and young."

You can get these pills through any medicine dealer or by mail at 50c a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Commands Atlantic Liner

Ronald Stuart Was First Canadian To Win the Victoria Cross In British Navy

At least one Canadian holder of the coveted Victoria Cross "worked his way" to England for the Prince of Wales' dinner on Nov. 9, and none can deny that he earned his passage. This is Commander Ronald Stuart, V.C., captain of the Canadian Pacific liner, "Duchess of York," the first Canadian to win the Victoria Cross in the British Navy.

Commander Stuart brought the C.P.R. steamer "Princess Elaine" to the Pacific coast on her maiden voyage last year and was later elevated to command of the crack Atlantic liner which he now sails.

Crude Petroleum Production

Alberta Produces About 86 Per Cent. Of Total For Dominion

Figures published by the Dominion Bureau of Statistics show that during the first six months of the present year 470,238 barrels of crude petroleum, valued at \$1,643,025, were produced in Canada. This is an increase of 168,676 barrels, or \$682,267 over the first half of 1928. The Province of Alberta contributed about 86 per cent of the total for the Dominion, having produced 405,970 barrels.

An Oil For All Men.—The sailor, the soldier, the fisherman, the lumberman, the out-door laborer and all who are exposed to injury and the elements will find in Dr. Thomas' Eucalypti Oil a true and faithful friend. To ease pain, relieve colds, dress wounds, subdue lumbago and overcome rheumatism, it is excellent. Therefore, it should have a place in all home medicine cabinets and be amongst those taken on a journey.

South African Envoy

A minister from another dominion of the British Empire has arrived in Washington, Eric Louw, of South Africa, and Mrs. Louw, detouring at Union station, were met by Ronald Campbell, charge d'affaires of the British embassy who, in the absence of Sir Esme Howard, will present the new minister to the American government.

"Made In Turkey" Week

Owing to the success of the exhibition in Constantinople of Turkish national products, it has been decided to fix a week in August every year and to exhibit and only articles produced in Turkey.

Mother—"Shall we invite the next door to your birthday party?" Little Lottie—"I don't think so, he's so good nobody likes him."

Another thing that the world needs is an alarm clock which will go right back and ring again after it has shut it off in the morning.

American Tribute To Ramsay MacDonald

New York Paper Makes Kindly Reference To His Sincerity Of Purpose

Though he modestly puts away the personal aspect of it, it has been a distinct triumph for Ramsay MacDonald, the man. His bearing has been perfect. Not one slip in act or speech did he make while he was here. Deeply impressive has been his abiding sense of the high mission on which he came, and which he hopes will lead to all-embracing benefits throughout the entire world. His eloquence has been that of elevation of mind and nobility of purpose. On divers strings he has sounded the one clear note of a passion to secure established peace on earth through every reasonable and honorable means. Such speaking as his, coming to a climax as it did in his magnificent address on Friday night, has seldom been heard in any country from the lips of a citizen of another.—New York Times.

Pleased With Trial Shipments

Good Market Created In Dutch East Indies For B.C. Apples

From trial shipments of apples made in 1928, it has been definitely ascertained that there exists a market for British Columbia apples in Malaya and Dutch East Indies. During the three years a steady increase is shown in the number of boxes entering Java—nearly 50 per cent, since 1926, and the prospects are that 1929 will see a still further increase. Australia, the nearest, is naturally the chief source of supply, followed by the United States Pacific coast.

All Night With Asthma. Everyone knows how attacks of asthma often keep their victim awake the whole night long. Morning finds him wholly unfit for a day of business, and yet, business must still be carried through. All this night suffering and lack of rest can be avoided by the prompt use of Dr. J. D. Kellogg's Asthma Remedy, which positively does drive away the attacks.

New Grain Loading System

New and Improved System To Be Put In Operation At Montreal

A new and improved system of grain loading will shortly be in operation in the Port of Montreal. The first of two mechanical grain loaders is being erected on shed 9, one of the berths allotted to the Canadian Pacific Steamships, and the second will be set up shortly afterwards. It is expected that further improvements along this line will be part of the fall building programme.

Smallest Aeroplane

The smallest airplane in the world has been developed in Vienna, Austria. Resembling a tiny limousine with wings, the craft is small enough to go into an ordinary garage. It is equipped with a 40-h.p. motor.

Geysers were discovered and first scientifically investigated in Iceland, and were first mentioned by the Scandinavian historian Saxo-Græmmaticus in his "History of Denmark" in the twelfth century.

A single-cylinder automobile made in Germany has a motor at the back.

Smothering Spells Couldn't Walk Far Gaspd For Breath

Mrs. T. W. Ruth, Kelowna, B.C., writes: "For over twenty years I was afflicted with asthma and was unable to walk far."

Cost Of Keeping Clean

Ten Cents Of Every Dollar Goes Toward Banishing Dirt Says Statistician

Ten cents of every dollar spent by the average American family is for the purpose of keeping clean, a survey of this little discussed phase of daily life by Ronald Millar, New York statistician, shows.

Basing his calculations upon a family of four, Millar, in The American Magazine, estimates that \$1,000 a year is the least price of cleanliness that can be quoted. Of this amount \$469.35 is the minimum yearly total for personal and household cleanliness; \$485 for the services of cleaners whether employed directly or indirectly, and \$72.80 for civic cleanliness.

In personal household cleanliness the statistician includes soap, polishes, shaving equipment and materials, hot water for washing or bathing, haircuts for husband only, toothbrushes and dentifrices, handkerchiefs, towels, linen and power or up-keep for whatever cleaning devices that may be used. The housewife is granted, under the second group, 35 cents an hour at the rate of two hours a day for 300 days in the year. Whether or not she receives any actual pay, the work is still chargeable since it is time which any woman might employ for cash profit. Likewise, says Millar, the cleaning of railway cars, automobiles and even the grooming of 19,000,000 horses that still exist in the country, ultimately becomes a charge upon the individual. "Food and shelter lead in the cost of living," says Millar, "but the cost of cleanliness is higher than that of clothes, education amusements, owning an automobile and many other things that figure more prominently in the household budget."

Recipes For This Week

(By Betty Barclay)

VEGETABLE SOUFFLE

- 1 cup left-over vegetables.
- 1 tablespoon flour.
- 1 tablespoon butter.
- 1 tablespoon sugar.
- 1/2 cup milk.
- 2 eggs.
- Salt.
- Pepper.

Add the flour to the butter which has been melted in a saucepan, and blend until smooth. Add the water slowly, while stirring to keep smooth. Cook one minute, stirring constantly. Then add the milk. Pour the mixture over the eggs which have been beaten until light, and to which have been added sugar, salt and pepper. Add mixture to the vegetables which have been placed in buttered baking dish. Bake in slow oven until souffle is set—about 40 minutes.

LEMON CATSUP

- Grated rind of 4 lemons.
- Juice of 4 lemons.
- 1 tablespoon grated horseradish.
- 1 teaspoon salt.
- 2 teaspoons white mustard seed.
- 2 teaspoons celery seed.
- 4 cloves.
- Few blades mace.
- Few grains red pepper.

Mix ingredients; boil thirty-five minutes, and bottle while hot. Let stand five or six weeks to ripen. Serve with fish.

No surgical operation is necessary in removing corns if Holloway's Corn Remover be used.

Rare Species Of Gold Fish

Shipments From Japan Supply Demand In Canada And U.S.

A shipment of 100,000 goldfish was recently sent from Japan to the United States from Koriyama-machi, an old town in Nara prefecture. This is the first shipment of its kind on a large scale and may be the forerunner of many more owing to the recent increase in the demand for goldfish in Canada and the United States.

The government railway authorities were approached with regard to the manner of shipping the fish from their place of origin to a seaport, and inasmuch as two-thirds of the fish generally die on the way, the railway officials decided to ship them first class on the same trains carrying passengers.

The fish are said to be of the rarest and choicest species of goldfish and are contained in 110 kegs of about forty pounds each.

Equip Gliders With Pontoons

Gliders are being equipped with pontoons in Germany to make landings easier.

When BABIES are upset

Baby ills and ailments seem twice as serious at night. A sudden cry may mean colic. Or a sudden attack of diarrhea—a condition it is always important to check quickly. How would you meet this emergency—tonight? Have you a bottle of Castoria ready? There is nothing that can take the place of this harmless, but effective remedy for children; nothing that acts quite the same, or has quite the same comforting effect on them.

For the protection of your wee one—for your own peace of mind—keep this old, reliable preparation always on hand. But don't keep it just for emergencies; let it be an everyday aid. Its gentle influence will ease and soothe the infant who cannot sleep. Its mild regulation will help an older child whose tongue is coated because of sluggish bowels. The genuine bears Castoria's signature on the wrapper.

England Not So Slow

When Necessary Can Show Other Countries What Speed Is

The distance between Paddington and Swindon, in England, is seventy-six and one quarter miles. The Great Western Railway of that country has announced that it has cut the time of one of its passenger trains between these stations to seventy minutes. That looks as if these English trains are operating at about sixty-six miles an hour.

Sometimes we think that we are masters of all the speed on this side of the water. When our trains average fifty miles an hour we consider that we are not letting any grass grow under our feet.

Not long ago a British aviator went out and flew a seaplane at a speed of 368 miles an hour. That was the fastest time ever made by any kind of vehicle capable of carrying a human being.

It must be admitted that when the Old Country people set out to make fast time they are in a hurry. It is quite erroneous to harbor the opinion that they are slow. They have a leisurely way in certain affairs, but in others they are speedy.

A New Fog Device

Navigating Compass Will Be Very Useful To Aviator

British aviators believe that fogs will be conquered by a small instrument that was recently successfully tested on a steamer travelling between Weymouth and the Channel Islands. It is called a fog navigating compass, and resembles a cross between a radio receiver and an X-ray apparatus. By means of a whistle on the receiver and pin points of light on a screen, the delicate instrument indicates the direction, distance and characteristics of fog signals. It is claimed that it may be used by air pilots to also detect distant gunfire and raiding planes.

Watch the Lanterns

The Farmer's Advocate says: As the days shorten the lantern comes into use in choring, night and morning. Plenty of hooks should be provided, and wires as well, along which the lantern may slide. Carelessness with the lantern has resulted in many disastrous fires.

Noted Western Writer Passes

Mrs. Charlotte Gordon, Of Calgary, Was Distinguished Author

Mrs. Charlotte Isabel Gordon, known throughout Canada by her pen-name, Charlotte Gordon, died recently at her home in Calgary, following an illness of one month.

Mrs. Gordon, who was the wife of A. J. Gordon, was one of Calgary's best known women writers, for besides the fame which came from the publication of her novel, "Red Gold," she was equally noted for her many magazine and newspaper feature articles. Last July she had the distinction of representing the Alberta branches of the Canadian Authors' Association at the annual convention of that organization in Fredericton, N.B., and the choice was a popular one, as in both the C.A.A. and the Women's Press Club, of which she was also a member, she was known as an ardent worker.

Deceased was the only daughter of Mr. and Mrs. James Melvin Toombs, who now resides at Vancouver, and went to school at Stonewall, Man., where her father was the editor of a newspaper. She married Mr. Gordon when he was living at Carman, Manitoba, and soon afterwards they moved to Vancouver, later coming to Calgary to reside in 1917.

Two In One

An old farmer was picked up on the highway and given a lift by a reckless driver. As he got out he said: "Thank you very much for both rides."

"What do you mean—both rides?" asked the benefactor.

"You have given me my first and my last," was the answer.

Another Titled Farmer

Sir Sandeman Allen, British Member of Parliament, has bought a farm in the Prince Albert district, to which he returned following his trip to the Pacific coast with Lady Allen and their son.

The Balkan Peninsula contains more native species of plants than any other country of Europe of the same area.

For over a century boric acid has been produced from scalding natural steam near Lardarello, in Tuscany.

Needless Suffering

The next time a headache makes you stay at home—

Or some other ache or pain prevents your keeping an engagement—

Remember Aspirin! For there is scarcely any sort of pain it cannot relieve, and relieve promptly.

These tablets give real relief, or millions would not continue to take them. They are quite harmless, or the medical profession would not constantly prescribe them.

Don't be a martyr to unnecessary pain. To colds that might so easily be checked; neuritis, neuralgia; to those pains peculiar to women; or any suffering for which Aspirin is such an effective antidote.

You need not hesitate to take Aspirin. It is safe. It is always the same. It never depresses the heart, so use it as often as needed; but the cause of any pain can be treated only by a doctor.

Figures Showing Cost Of Wars Should Bring Home To Everyone The Futility Of Armed Conflict

Everyone must fight if we have another war. The fighting won't be only on the battlefields. There will be fighting on the land and on the sea and in the skies. It will be carried right into the homes of the peoples. Everyone will fight — and everyone will lose. The cost would be unthinkable, and part of the price might be our civilizations. Even the victors must lose in modern warfare. The Napoleonic wars (1790-1815), a conflict that lasted 9,000 days, killed 2,100,000 human beings, and cost \$3,070,000,000.

The American Civil War (1861-1865) lasted 1,350 days, cost 635,000 lives, and \$7,000,000,000.

The Franco-Prussian war (1870-1871) lasted for 210 days and cost 280,000 lives and \$3,210,000,000.

The Russo-Japanese war (1904-1905), lasted 548 days, cost 160,000 lives and \$2,100,000,000.

The above figures are for wars of the recent past, but how they pale before those of the World War!

The World War (1914-1918), lasted 1,563 days, cost 9,815,000 lives and \$186,233,637,097.

Now, all the real property in the United States, from the Canadian border to the boundaries of Mexico, and from the Atlantic to the shores of the Pacific Ocean, are worth considerably less than the cost of the World War.

It should interest and impress all engineers, business men, and all other people with common sense to learn that all the steam railroads and their equipment, all the motor vehicles, all the street railways, all the telegraph systems, all the telephone systems, and all the electric light and power stations of the entire United States of America could be purchased for a sum of money considerably less than one-quarter of the cost of the World War.

We have been told that of all the moneys raised from the peoples of the earth in taxation, eighty cents out of every dollar goes to defray the costs of the wars of the past and in the preparation of future wars. The thing is absurd.—General Electric Review, 1929.

Rural Credits

Dominion Farm Loans Board Now Operating In Six Provinces

The province of Manitoba which has just recently come within the scope of the Dominion Farm Loans Board's operations, brings the total of the provinces now embraced within the scheme up to six, declared Dr. J. D. MacLean, chairman of the Board here recently. Alberta, British Columbia, Manitoba, Quebec, Nova Scotia, and New Brunswick, are the half dozen in which the board operates.

Saskatchewan and Ontario have provincial systems of rural credits, while Prince Edward Island apparently is in need of neither the one or the other.

The work of the board has been extended only recently into Quebec and Manitoba, and so far no applications for loans from these provinces have been received. Since its inception until October 16 last, the board has approved 807 loans to the four provinces of Alberta, British Columbia, New Brunswick, and Nova Scotia; 67 have been rejected and 178 are pending. The total amount of money extended to applicants is \$100,000.

Awarded Scholarship

James Richard Alton Polard, Regina, honor graduate in arts, of class '25, at the University of Saskatchewan, receives the War Memorial Overseas scholarship for Saskatchewan, awarded by the Imperial Order, Daughters of the Empire. The choice was made by the committee of selection in Saskatoon, recently. Mr. Polard has specialized in history and will pursue the study of that subject during his year abroad.

That Was Over

An American tourist who had climbed the Vesuvius one hot day gave a perfunctory look around when he had reached the crater. Taking out his book, he ticked off "Vesuvius" in his itinerary, and turning to his guide, grinned "OK," and immediately began to descend.

Hailstorms are frequent and severe in sub-tropical regions and are rare in the coldest parts of the earth.

In 1922 the first telephone conversation across the Atlantic took place.

"You eat all day, but work? Never. I don't believe you are listening to what I say."

"I thought you were talking to yourself, sir."—Lustige Kölner Zeitung, Cologne.

Prizes For Canadian Fruits

Exhibits From Dominion Win Awards At British Exhibition

Thirteen first prizes in apples, one first in pears and four seconds in apples were awarded to Canadian exhibitors at the Imperial Fruit Show, which was held at Bingley Hall, Birmingham, according to cabled advices received at Ottawa by the Department of Agriculture. Eight of the first prizes were won by Nova Scotia apple growers, and four by British Columbians. Nova Scotians secured the three second prizes. The most successful individual Canadian exhibitor was Charles A. Bentley, of Berwick, N.S., who secured no fewer than five firsts. The Associated Growers of British Columbia, Limited, of Vernon, B.C., obtained three.

The British Columbia company were also successful in the British Empire section, securing a first and second prize.

To Study the Arctic

Expedition Of Graf Zeppelin Will Investigate Scientific Subjects

Dr. Walter Bliston, secretary and treasurer of the Aerial Arctic Society, announced plans for a voyage of Arctic exploration aboard the Graf Zeppelin to be taken next April by a group of 12 scientists headed by Fritz Jof Hansen. The principal objects of the projected expedition, Dr. Bliston said, would be to make the boundaries between the deep and shallow parts of the Arctic waters, to study meteorological conditions and to prepare for the establishment of scientific station in the ice fields.

A black crepe satin with buttons down the back is new youthful Paris vogue showing the very feminine note that dips the hem. Sleeves are slenderly fitted with darts below the elbows.

Style No. 675 is cleverly designed to give height to the figure. It is a dressy affair for afternoons that is simple enough for general wear, and it doesn't require any trimming.

It is captivating in black transparent velvet or in printed velvet in burgundy tones. Claret red canton crepe, plum shade in silk crepe, purple crepe Elizabeth, dull black silk crepe, and hunter's green canton crepe smartly appropriate.

It's easily made and the saving is remarkable. It's a wonderful opportunity to have a Parisian model that shows such perfect taste for all-around afternoon occasions, at the cost of the fabric and a few hours of your time.

It is designed in sizes 16, 18, 20 years, 32, 34, 40 and 42 inches bust. Pattern price 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Winter Protection For Plants

Many Plants and Shrubs Need Some Protection During Winter Season

There is a long period from November until April or later, when many plants grown in Canada need some protection either from low temperatures, changeable weather conditions, early spring frosts, or from mice and rabbits.

Beginning with the rose, the better varieties of which need winter protection in all but the mildest parts of Canada, covering with soil just before winter sets in seems to be the surest method of protection. The plan is to mound up the bushes for a few inches, having a broad base to the mound so that the roots will be protected as well, then bend over the top, and in the coldest parts cover with soil also; but, in other places, where the snow comes early and is usually deep, covering with leaves is sufficient, some boughs being put over the leaves to keep them in place. Covering with straw manure has been found a good way of protecting roses, and, better still, an inverted trough over the roses and this covered with manure. Climbing roses should be entirely covered with soil, or covered over with boxes filled with dry leaves, or covered with heavy paper or boards.

A covering of leaves over the herbaceous border protects the plants and helps to bring plants that are a little tender through the winter.

In some parts of Canada daffodils are not sufficiently hardy. In such places, if mulched with straw or leaves before being frozen in the soil, they will be much more likely to come through than if unprotected.

Sacking wound around rather tender shrubs in late autumn will assist in bringing them through the winter in good condition.

On lawns where snow blows off at certain corners during the winter, a much of manure will help hold the snow and protect the grass.

Grape vines should be taken down and covered with soil in places where it is too cold to grow the grape commercially, for if left unprotected, if the canes come through the winter, the buds are liable to be killed or killed in the spring and the crop lost for that year.

A very light covering of straw spread over the strawberry plantation just before winter sets in will sometimes save the plants when, if left exposed, they would be killed. This prevents thawing and freezing, especially in late winter or early spring when the ground is bare of snow.

The destruction of trees by mice in winter is often very severe and frequently so discourages those who are trying to develop an orchard that they do not plant any more trees. Several methods may be adopted to prevent the mice gnawing the trunk. The best method is probably the wire protector, about 18 inches or less high, made with a mesh small enough so that the mice cannot go through it. Once these are put around the trees one need not worry about mice for several years. The protectors must be put close to the ground so the mice cannot get between the protector and the ground. Another method of protection is to tramp the snow down well about the tree after the first snowstorm. This prevents the mice from getting at the tree near the ground, where they usually begin working. Sometimes, however, snow does not come early, and injury may be done before the snow can be tramped. Another method is to use fresh cow dung around the tree. This freezes solid and prevents the mice starting at the base of the tree. The cow dung should be spread as soon as spring opens, otherwise it may injure the trunk. Unfortunately, there is no good protection from rabbits. The wire protectors will protect the trunk of the tree for a certain distance up, but the rabbits work on top of the snow and eat the tops. Everything possible should be done to exterminate the rabbits before winter sets in. — W. T. Macoun, Dominion Horticulturist.

Revolving Statue For Moscow

Gift Of American Soviets Is First One Ever Made

A large bronze statue, made in the United States, and paid for with American dollars, in the near future, will be the principal adornment of the public square in front of the Palace of Labor, the headquarters of the trade unions in Moscow.

Responding to a proffer by the American Society of Friends of the Soviet Union, the Trades Union Council has signified its readiness to accept the gift and to place it thus conspicuously as a token of Soviet-American friendship.

The statue will revolve slowly on its base, making a complete revolution once in 24 hours. According to Adolf Wolff, the sculptor, who visited Russia, this is the first revolving statue ever made. The power will be provided electrically.

Will Permit Smoking

Smoking, which is forbidden aboard the German dirigible, Graf Zeppelin, may be enjoyed aboard the British airship R-101, but electric lighters, with which the room is equipped, must be used instead of matches.

"When I came into the room last night I heard someone say to you 'Is that the beautiful Miss Rose?'"

"Yes, with the accent on the 'that'."

"LAND OF THE SOVIETS"

Four Russian aviators flying the "Land of the Soviets" from Moscow to New York, took off on October 19, from Vancouver, Wash., for Oakland, Calif., first stopping point of their final long hop across the United States. The fliers were forced to land on account of engine trouble. The photographs show: (1) "Land of Soviets," (2) Philip Bolton, second pilot, (3) Dmitry Filafiev, mechanic, (4) Semen Shastakon, chief pilot, and (5) Boris Syringor, navigator.

Superstition Dying Out

Witchcraft Among Pacific Coast Indians Is Disappearing

Witchcraft among the North Coast Indians has practically disappeared, and the Indians are following the white man's ways, according to W. E. Collison, Indian agent for the Prince Rupert district.

Such demonstrations as dancing feasts are unknown now in the settlements along the Skeena and Naas Rivers, according to the agent. The picturesque medicine man is a figure of antiquity, he says.

Although superstition, bred down through many generations, and the belief in necromancy are not yet entirely rooted out, there is no actual practice of such in the district. No Indian now would go further than to possibly accuse another's bad spirits for causing death, and even such an incident would be rare, according to Mr. Collison.

Received Queer Training

Men Unacquainted With Farm Work Returning To England

Some 200 men, who are returning to England, admit that though they accepted training there at the public expense, together with free board and free transportation to Canada, they never intended to do farm work. If their statement that they never saw a cow or a plow in the course of their training is correct, it would be interesting to learn what kind of training they were given and how much it cost. Taken together, the men's confession of their dislike for farm work and the complaint about the refusal of the Canadian farmers, with whom they were placed, to pay the promised wage of 10 pounds a month.—Truth, London, England.

Record For Building

Building permits issued in Canada during the first eight months of this year reached a total of \$168,606,059. Not only was this the highest for the period ever recorded by the Dominion Bureau of Statistics, but it was 36 per cent above the previous high record in 1928.

A moose can pick up a scent more than a mile away.

Says British Empire

Not Commonwealth

Use Of This Title Wrong, Says Sir John Sandeman Allen

To call the British Empire a commonwealth of nations is quite wrong, the Toronto Board of Trade was told at the Royal York hotel by Sir John Sandeman Allen, J.P., M.P., chairman of the Royal Empire Society, member of council of the International Chamber of Commerce, and secretary of the commercial committee of the British House of Commons.

"Most people," he said, "talk about the empire as a commonwealth of nations. This is wrong. The empire is divided into three parts, of which the British commonwealth of nations is one. This is the governing body of the empire, and is made up of a group of independent nations, who are mutually interdependent. There is not one country, but 407 separate nations of different creeds and castes, who before the advent of British rule were continually at war with each other, the weaker preyed on by the strong. Now India is two-thirds ruled by native princes responsible to the British crown, and kept together by Pax Britannica. The third part of the British empire is the colonial empire. This is the countries where the populations are not yet fit to govern themselves entirely, but are ruled by the crown, under the principles of British freedom and equality for all."

New Variety Of Potatoes

"Never Rot" Developed At Truro Agricultural College Farm

Announcement has been made that a new variety of potatoes known as the "Never Rot" has been developed at the Agricultural College farm, Truro, Nova Scotia, during the season just closed. This is the first year the "Never Rots" have been grown at the farm here, but in Yarmouth and Digby by counties experiments have been going on for 25 or 30 years. They were brought to the western part of the province by a French vessel from South Africa.

Then there was the Scotchman who, when asked what he had clenched in his fist, answered: "My wife's false teeth—she's been eating between meals."

Changed Methods in Handling Milk

Where proper sanitary measures are neglected the bacteria in a drop of milk look like this.

Where sanitary precautions are taken there are few harmful bacteria in milk. The white specks are bacteria.

How much do the farmers and dairymen of Canada and United pay in toll to bacteria in milk? In process of arriving at the answer to this question, representatives of leading milk and dairy products companies of New York recently met with officials of the State Agricultural Experiment Station, with the Department of Farms and Markets and the College of Agriculture at the Experimental Station, Geneva.

The bacterial count is being used more and more as a basis for determining how much per pound a farmer is to be paid for his milk. Getting the bacterial count under a given figure means millions of dollars annually to dairymen. Dairymen, themselves, are alive to this question, and where the milk produced is a material part of the income from the farm, complete sanitary precautions are being taken to insure a low bacterial count in the milk.

Precautions start at the beginning of milk production and continue clear through until the time the milk is in the hands of the consumer. To begin with, properly ventilated, easily cleaned stables are provided; plenty of bedding is given the cows; platforms are built the right length to accommodate the particular breed of cows that are kept; the gutter is built wide and deep; the animal

is clipped about the udder and flanks periodically. The cows are groomed carefully every day and just before milking, loose particles of dirt are brushed off, or, when the cow is clipped, wiped off with a damp cloth. Small top milk pails are used to receive milk from the cows. Utensils such as milk pails, milk cans, milking machines and separators, are thoroughly sterilized after each milking.

The fresh-drawn milk is immediately removed to the cooling tank where it is cooled to a temperature of 50 degrees to 60 degrees Fahrenheit.

On receipt at the dairy, the creamery or the condenser, the same extreme sanitary precautions prevail. White garbed workers, who have passed medical inspection, who observe rules of personal cleanliness as well as hygiene in the handling of milk and milk products, go about their duties efficiently and intelligently. Immediately after the pasteurizing of whole milk it is bottled and capped. The date of bottling is stamped on the cap and the milk is usually sold before 36 hours have elapsed since pasteurizing.

What difference over the oldtime methods of handling milk!

It is these changed methods in the handling of the nation's milk supply that has swelled the individual consumption of milk to more than 34 gallons per year.

Predicts That Crow's Nest Pass Agreement Will Govern Grain Rates On The Churchill Route

Lights Make Hens Lay

Increases Winter Production But Does Not Affect Yearly Total

In view of the fact that fresh eggs are nearly always a higher price during the winter season than during the summer many poultrymen have been interested in the possibility of increasing winter egg production by the use of artificial lights.

At the Dominion Experimental Station, Kapuskasing, Ontario, an experiment has been conducted for a period of five years in order to obtain some data on this subject. The experiment covered a period of six months each year, from November 1 to April 30, during which time the electric lights were turned on at four o'clock in the morning and remained on until daylight. One hundred pullets were used. These were divided equally as to weight, general development and breeding into two pens of 50 each. All conditions were made similar except that the one pen had these extra hours of light to work.

Over a five-year period the pen on lights produced on the average 3,966 eggs, at a cost of 20 cents per dozen, in the six months; while the pen without lights produced 3,671 eggs at a cost of 22 cents per dozen. This gives an advantage of about 300 eggs for the pen on lights and at a reduction in cost of 2 cents per dozen.

During two of the years covered by this experiment the test was continued until October 31, making of the complete year. In the two-year average over the whole year, the pen with lights laid fewer eggs than the pen without lights.

From the figures obtained to date it would appear as though lights have an effect on the number of eggs laid during the winter months, when the eggs are highest in price, but on the other hand they do not seem to materially alter the total number obtained for the whole year.

Increased Demand For Beef

Price Will Be Higher Next Spring Is Prediction

Beef prices in Canada next spring will be high, due to the fact that there is a shortage of beef cattle in the country and comparatively few fat cattle going into winter feeding.

Trade reports for September show the exports of fresh beef to the United Kingdom as being nil, and the United States there was a falling off from \$1,107,208 to \$487,912.

No fresh beef has been shipped to the United Kingdom for several years. At present the price in Canada is so good and the demand so steady that there is only a spread of two cents a pound between the best English killed beef and Canadian beef. The cost of transportation is three cents a pound so that it does not pay to ship.

Supplies of cattle reaching Canadian markets at the present time are very moderate, say officials of the livestock branch, both in Eastern and Western Canada. There has been no liquidation, however, no forced selling, so the farmers have not done so badly.

The domestic demand at good prices indicates a measure of prosperity in the country, when people are able to buy meat at good prices despite the competition of the American consumer wanting Canadian beef.

American Faith In The British

Understand and Respect The Culture Of The British People

We trust the fundamental soundness and liberalism of the British people, who put men like Asquith, Baldwin and MacDonald in office, and who in some ways are bolder for peace and social equity than we; we trust a British Empire which gives autonomy the freest scope. We understand and respect the culture of the British, and they understand and respect ours. In this understanding and liking the democratic young dominions are increasingly important. — New York World.

Identity Not Important

The Governor of the State was inspecting some of its institutions. When he reached one of the insane hospitals he received a message to call his office on an important matter. Not getting as quick service as he thought he should, he barked at the operator, "I guess you don't know who I am?"

"No," replied the operator, "but I know where you are."

"I advertised that the poor would be welcome in this church," said the minister, "and after inspecting the collection, I see that they have come."

The Wife: "There are two ways of looking at every question." The Husband: "Yes, I know. Yours — and the wrong one."

The White House was first painted white to obliterate marks of fire left by the British invasion in 1814.

In the opinion of Hon. Charles A. Dunning, Minister of Railways, the Crow's Nest Pass agreement will govern the eastbound rates on grain and flour on the Hudson Bay Railway.

"There is no doubt in my mind," he said today, "that grain will travel to Churchill on a mileage basis the same as to Fort William." Mr. Dunning explained that he could not speak in regard to general freight rates, but grain was in a different category.

"In respect of all other rates," he said, "when the road approaches operation, the Canadian National will have to file their rate tariffs with the Board of Railway Commission, and it will be open to everyone to appeal against these rates if they are not satisfactory."

Mr. Dunning said that he had been pleased to note that the people of Saskatchewan, in this respect, had not been inactive. The traffic organization of Saskatchewan, he believed, had been accumulating information on Hudson Bay route rates for some time and, undoubtedly, would defend the interests of shippers at the proper time before the rate making body — the railway board.

Mr. Dunning, as a matter of fact, has paid much less attention to the rail rate aspect of the Hudson Bay route than to the ocean rate. He regards the rail rates as being entirely within the jurisdiction of the Canadian people, while the ocean rates, which will be of equal importance to the success or failure of the route, are not controllable by Canada. Therefore he has designed the policy of his department from the outset of his administration to obtain as much evidence as possible on the vital question of the safety and efficiency of the Hudson Straits and the Bay from the viewpoint of navigation.

To this end, every ship which has been chartered by the government to carry supplies into Churchill or to sail in these waters, for any purpose whatever, has been chartered on the basis of time. As a rule, ships are chartered for a fixed sum, and the Dominion might have saved a little money by driving a hard and fast bargain with the owners of ships which have been chartered to sail in these waters. Mr. Dunning thought this would be unwise. He has chartered on time.

The result has been that he is building up a record of the time it has taken ships to go into Churchill and out again to home ports and is in a strong position to prove that the delays in navigating the Straits and the Bay, due to fog, ice or other perils, are negligible.

In regard to the general progress of the work, Mr. Dunning said that the railway will be in operation next summer and the port will be open for commerce in the fall of 1931. The past season has been very successful in every respect. The work at Churchill is well up to schedule. In fact, the work allotted for this year was completed on October 21, and the engineers took advantage of an extremely high tide on that night to beach the dredges and scows and tugs far back on the beach where there will be a minimum of risk from storms during the fall and spring.

During the summer, 500,000 cubic yards of material had been removed from the harbor and it was only necessary for the dredges to stop work on one day on account of weather conditions.

While a little shore ice has been noticed at Churchill in the mornings during the last few days, Mr. Dunning stated that it would not impede navigation. With regard to the Straits, Mr. Dunning said that his reports today (Oct. 25), were to the effect that no ice is yet visible at any one of the three direction finding stations situated between the Atlantic and the Bay. Fox Channel ice, so often referred to as a peril to navigation in the autumn, has not yet appeared. There really seems not to be much difference in the temperature at Churchill and points inland. For example, the temperature on October 25 varied between 46 and 32 degrees above zero, which would compare favorably with most cities in Canada on that day.

The Psychology Of It

If you scrape the other fellow's fender, it is because he didn't give you enough room. If he scrapes your car, he is a nit-wit driver whose license should be taken from him. And just so long as this is the psychology of motor car owners, space will be set aside in the newspapers each day to record accidents.

He: "Have you heard that I have become an actor?" She: "No, I only heard that you had gone on the stage."—Musiketa, Vienna.

Both Sides Of Amiens Settlement Dispute Stated In Letters To The Editor

Extra space is accorded for these letters, which should contain sufficient information to enable a balanced public opinion in the matter, and close the subject in these columns for the time being.—Ed

Editor News
The attention of settlers on Amiens farm has been drawn to the fact that at the present time, an emissary of the S.S.B. is actively engaged in seeking to turn the people in this district against us. He seems to have nothing else to do and I have been asked by the settlers to allow us space in your column to set a few facts before your readers, as we have not the time, nor would we be paid out of public funds for doing such work.

We were given by Dominion Government agents in the Old Country, booklets dealing with the 3000 family scheme and also a memo. dealing particularly with this area. The booklets consist of a great deal of innocent looking and disarming "dope" and the memo-statement ranges from that to as low as absolute untruth—and also—there are a number of very significant omissions.

The memo, says in fact, "this farm was successfully operated as a dairy along modern lines by the Hygienic Dairy Co. of Vancouver," you all know this is untrue.

It also tells us that farms would be fenced, we have had to do all fencing—some of material for boundary fences was supplied by the S.S.B. Another paragraph says "the soil is uniform throughout"; "very fertile" and that it produces large yields of grain, hay, potatoes etc." The soil is not uniform—nor are the prices uniform as one would conclude from such a statement. People in this district know perfectly well that this land was "mained" for some years before we came, that such is not "good farming practice" and that fertility is not maintained thereby. Furthermore it takes twice as long to bring the land back to its normal state of fertility. Original crops taken off by us are not to be compared with crops taken off the same ground since.

The memo further states "Drainage is provided by the creek which runs through the farm and large exterior ditches which are maintained by the Provincial Government". The creek is a slough and the large exterior ditches are a district charge against the land for both capital and maintenance. This information was left out, as also was the fact that assessments for dyke on the Fraser River were a direct charge against land. Surely we should not be required to come 9000 to 7000 miles to find out whether statements issued by a Government Department are true or not. The statement is also made that this is a good example of a prosperous rural community—I only ask your readers to look up the Matsqui Municipal accounts for 1923—I ask you is the fact that \$10,800 taxes three months overdue, outstanding at 31st Dec. (and carrying a penalty of 15%) indicative of prosperity?

The booklets given us contain a lot of "dope"—"downright hypocrisy"—such statements as "The experience of the average settler is one of average success, of which little or nothing is reported in the press". One of the functions of the L.S.B. is to safeguard the settlers from exploitation in the purchase price of lands which they may buy; also that we are to follow cheerfully the advice of the Canadian Farm Supervisor. "Also the annual payment in respect of a loan will amount to not more than \$360 per annum—this last on fly leaf of application form.

Now, the Supers. methods are well enough known—sufficient to say that they play the "Come into the parlor said the spider to the fly" game to perfection and after signing various papers, agreements etc. "along the dotted line" one finds oneself completely at their mercy and they have little of that when they get the settler or his wife by himself or herself.

We are told in booklets and also in "agreement for sale" that no demand for payments will be made until the 1 of October second following settlers arrival in country. They do not stick to this—demands for payments were made in most cases before we were 6 months here; and if these demands were not met, loans for S. and E. were held up—consequently we had to meet their demands if we wished to farm and that by assignment on our milk cheques.

As time went on we found that our local debts were mounting and that we could not meet these. We drew the attention of the S.S.B. Ottawa to this in December 1927, and March 1928, received a reply from chairman stating

Abbotsford Brokerage & Realty Co.
Phones: B.C. 116; Farmers 3425

Dear Mr. Editor:

I read with interest a couple of articles in your progressive little paper outlining the terms and concessions granted to the Amiens settlers, which are not satisfied with. Why grant any concessions anyhow? When one has had the use of land, stock, and implements free for three years, what more can be expected? No concessions were granted the Veterans when they went "back to the land"—those that made a hard bargain had to abide by it. The price of the land to them was half as much again as it is now, and they had a hard struggle, after many years fighting, to get a re-valuation.

Wanting something for nothing is a national characteristic. That is the whole trouble. When families are brought out practically free, land provided for them, houses partly furnished, use of cow and chickens free for one year, with option to change location, if not suitable within a reasonable time, in many cases work found for the men, and other advantages, this surely must be a fair proposition, without granting any other concessions.

One of the agreements, of course, is the price of the land. On taking over the land they agreed to pay the price, which is considered a market price all through the Fraser Valley for prairie land ready for the plough. In the Peace River one can get 160 acres for \$10. There are always two sides to a question. Quoting cases that we know of, where settlers have taken out their loan, bought stock, implements, etc., through the Board, had the use of them for two or three years, then "get out" buy other land from private firms, pay cash for it, owing the Settlement Board or the Imperial Government hundreds of dollars. Is this fair? Either to the government, the returned man, or others, who are staying right with things and trying to meet the payments on their farms, often under very great difficulties.

It is hard to conceive what more legitimate concessions the settlers can expect. They boast about the land they can rent in the "Old Land" for less than one dollar per acre. Why come to Canada?

Premier Tolmie, speaking at St. Andrew's dinner at the Hotel Vancouver on Saturday evening, referred to "Scottish boasts being numerous". Maybe this is one on them. Some of these settlers really seem to need feeding with bottle instead of the proverbial spoon. Go ahead, Mr. Forke, and raise Hades. The canny Scot is a proud and independent man, he always pays—when he has to.

Clayburn, Dec. 2. "BOURGEOIS" that he was formulating a scheme for our assistance, but was waiting on "information with regards to the situation as it appeared to us" and we would then hear from him. Previous to this, while waiting on chairmen reply we drew up a communication dealing with foregoing misrepresentations and the day following it's despatch we had a call from Superintendent of Vancouver office on some mysterious mission of which he had little to say. All he would do was to ask individual settlers if they had all the stock they required or questions of that type. This was more than we could stand—some of us had not seen butcher meat, sugar, butter or flour for weeks and we were in no mood to stand the "dilly dally" of smug officialdom. In addition we had invited the said superintendent 15 months previously to meet and discuss matters and this was the first of him. As the result of this we immediately wrote to Ottawa, demanding an impartial investigation; but this we were told in reply, we might get in Russia. We wonder if it has ever occurred to the authorities that the Great War, the post war condition of Russia, most of the present day industrial unrest and may we say—our own and soldier's settlers conditions are caused by what is known as "The abuse of power by Bullheads in Authority". Canada has we understand, signed a Pact outlawing war and agreeing to

Abbotsford Personals

Several sections of 24-inch Clay-burn sewer pipe have been laid across Oscar street north, replacing a broken cedar culvert.

A quiet wedding was solemnized in Vancouver last Saturday evening, when Mr. Thos. G. Andrews of Abbotsford and Miss E. Jackson of Vancouver were married. Mr. Andrews is janitor of the local school.

The Rapid Transit bus has been taken from the Abbotsford-Mission run to help operate the emergency service Vancouver-Point Grey, because of power shortage. W. J. Sayce will take care of the Abbotsford-Mission run for the winter months, and will leave Abbotsford at 1:15 and 6:30 p.m. for the north shore each day.

Mr. J. Fairholm from Alberta has purchased the Chesterman property on the King Road and is now working this place.

A very successful bazaar was held by the Ladies' Aid of Trinity United Church on Saturday last in the Hotel Atangard. The proceeds of the occasion amounting to \$205.30.

submit international dispatches to arbitration and yet she denies to those within her borders the same privileges.

In May 1928 in order to pay our burden of debt to local merchants we commenced shipping milk in our wives names, thereby putting the assignment out of commission. This has continued ever since and some of us are still not clear of our local debts.

The S.S.B. have consistently ignored our representations regarding misrepresentation and the impossibility of meeting their demands in full and paying taxes. In addition the scheme which the chairman was formulating to assist was never presented—albeit according to a letter received from Lord Lovat after his visit here, his Lordship left under the impression that it had been.

We have received several demands for payments since, but we are not going to comply as we would only land bank where we were, and, in addition, it only postpones the evil day; and we much prefer for the the good of all settlers, that matters be brought to a head now.

The present provincial Minister of Agriculture and his predecessor in office have told us that, unless we have 50% of the purchase price to put down it is a burden from under which we can never hope to get. Many others have said "It can't be done," and in any case, if we had the full cash, it is doubtful if we would continue to work with an organization which needs changing from top to bottom and which depends for continued existence on doped dupes from the Old Country.

Stated briefly, our kick is against a system which allows a government organization, which is, we understand, above the law, to place settlers on land priced far above its economic value, permits said organization to take advantage of misrepresentation and commit breaches of agreement and makes no provision for protection of settlers against such abuses.

We are quite willing to give any person interested access to all papers and correspondence in connection with this question.

May I express the hope that when the trouble here is over, and whether we leave or stay, that, in future, due regard will be paid to all that is truthful and honorable in dealings with settlers. It will do the country a deal of good. Our experience leaves a bad taste in one's mouth. H. J. WALKER

The Power Shortage

Weather conditions which are unprecedented in British Columbia have brought about a serious power shortage

With the rainfall at Lake Coquitlam 70 inches below normal and no rain in November, the water supply behind our dams at this writing is nearly depleted.

Until heavy rains relieve the situation, we would ask our customers to curtail their use of electric current to the greatest possible extent, so that the most essential industries may obtain service to the maximum degree as long as it is available.

Elks Hold Memorial Service

One of the best-attended lodge memorial services held in the district was that of Aldergrove B.P.O.E., No. 66, conducted in St. Matthew's church on Sunday afternoon last.

Lead by Exalted Ruler W. C. Blinch, the service opened with a ritual by officers of the lodge: Bros. F. Eye, L.K. D. G. Nicholas, Loy K. H. W. Conway, Lec. K. H. E. Beeststone, Sec. G. Gough, C. Opening ode, sung by the congregation was "Memories Given on each heart." The invocation was followed by a solo song by Mrs. W. C. Blinch, and hymns: Mrs. A. Conway also rendered a solo, both ladies choosing compositions most suitable for the occasion, displaying excellent vocal ability. Kateby's "In a Monastery Garden" was admirably rendered by W. J. Sayce, whose fine voice was at its best in the sonorous passages of that beautiful piece. E. A. Barrett sang "My Task" a selection well fitted to his impressive tenor. The organist was W. Morgan, whose recital was two numbers.

Rev. E. H. Baker, in his address, entitled "Our Absent Brothers" suggested primitive customs of blood ritual and tribal affiliations as part of the fraternal historical background, and continued from these inferences to explain the finer principles of a true "Christian" brotherhood.

Lines were spoken by the Exalted Ruler, as part of the closing ceremony, which concluded with the National Anthem, and benediction by the Pastor.

Customs Port At Columbia Valley Advocated

The establishment of a joint customs and immigration service at the international boundary north of Maple Falls in Whatcom county, and near Kootenai in Columbia Valley south of Cullis lake, is asked for in a petition recently forwarded to the U. S. Customs department at Seattle. The request is endorsed by the Bellingham chamber of commerce, automobile association, county and city officials, and prominent citizens of the northwestern section of the county. The petition states that "there is now a good road to the line and the Canadian authorities are improving the road on their side of the line, which makes it a connecting link between this point and Chilliwack. If facilities are provided for the crossing of the line at this point, it will enable people of the neighborhood to go back and forth at a saving of from twenty to forty miles over having to go around by Sumas. This road shortens the distance to Cullis lake, a resort on the Canadian side, by several miles, and also shortens the distance very materially from Chilliwack and the Fraser Valley into the Mt. Baker National Forest. It further provides an alternate road between Bellingham and Chilliwack, which will be a very attractive road for tourist travel and create a logical and desirable addition to the road system." Customs facilities are asked between 8 a.m. and 8 p.m. from May 1 to October 1.

The promoters of the new road and customs and immigration service in Washington suggest that interests on this side of the line petition the Dominion authorities for such a service—Chilliwack Progress.

G. D. Hubbard, collector of Customs, Sumas, Wash., is advertising for claimants for 156 bottles of distilled spirits and wine, seized at the port of Sumas on September 8. Unless claimed within 20 days after Nov. 29, the liquor is to be destroyed.

Our kitchen snooper comes in with the report that one of the local bakers is announcing his Christmas puddings with genuine O.P. rum.

Trade Board To Meet Evenings In Future.

Monday's Board of Trade meeting brought out discussion, relative to the sparse attendance, and disinterest of local merchants in the organization's efforts and the fact that more aggressive bodies in neighboring towns were "putting over" measures which will eventually build up other centres at the expense of Abbotsford. However, the lament was not unextenuated, and those present decided to leave future meetings to the call of the chairman, with the understanding that he will get a few interested citizens together immediately after Sumas land bids are opened by the government, and send a delegation to interview the "new owners" of Sumas lake lands. This action will be taken in an effort to avert the threatening direction of Sumas colonization from Chilliwack.

Frank Beltrame, who operates a vineyard and experimental farm near Sumas pumping station, attended the meeting, and was given information relative to his lands, in the event of sale of the lake area. The Secretary was delegated to write a letter to the Minister of Agriculture upon this and other matters.

A letter from a Matsqui farmer, who levelled complaints against three of the town's business family, was turned over to Secretary Thorn, to take up with those specifically concerned.

Last Day Of the Trout Season

THERE'S a touch of frost in the air—a smell of cedar and damp maple leaves; the eastern hills are draped in fleecy mist, and in the valley the floating veils lift and thin to the rising sun.

On such a morning one gives thanks for being alive, throws off the yoke of care, and the "petty larceny" worries of everyday, and goes fishin' in 'Old Man River finds priest and doctor, philosopher and friend.

The risen sun beams down on Sumas Prairie, shedding its rays with the utmost impartiality on Native Son dairy farms, Hungarian tobacco patches, laager beer vineyards, Mongolian wurzel ranches and Mennonite artichoke haciendas; and even penetrates the gloom enshrouding those vast government willow orchards and thistle-down broadcasting stations.

Across the prairie and over the mountain road until the Vedder sparkles on our left; the car parked, rods assembled and away to the river in a fever of anticipation. Passing a serious-looking boy on his way to school, Old Nick prompts a "How would you like to play hooky, son, and go fishin'?" which drew the usual reply "Naw, I've got to go to school." Very commendable and that lad is bound to make a million, but goodness knows what he'll spend it on.

Here on the river bank are the incorrigibles; the old married stuffs who ought to know better. Look at that domestic tragedy over there seated on a log, his eyes glued on the water and a might—as well-be-hung-for-a-sheep-as-a-lamb expression. One can almost hear the sniffs that followed him when he grabbed the old pole and pus-syfooted out of the back door; the acidulated queries regarding the wood pile, the sick cow, and who was to blab, blab, blab, while he went fishing? the no good bum.

Stay with it old-timer, you are beating the papers out of another "Found with his throat cut" or "Discovered hanging in the woods" which headed the headline. Yes, he undoubtedly caught a hatch, and a double hell when he left home and will get more of the same when he gets back, but meanwhile 'wowie', did you see that big fellow get away that time.....thats the spirit, old trapper.

There's fat old Bill standing in the icy water up to his second helping of porridge....."Lo Bill, how's the rheumatism?" "Rheumatism's be blowed, feller, take a look at that steelhead lying on the bank, ain't he a beauty?" And so it goes, falling over windfalls, splashing in over ones rubbers, impaling spoons on every sunken snag, getting wet, dirty, tired and thoroughly happy;....in fact, 'just fishing'.

Then, the ride home, the old pipe burning fragrant incense to the God of Contentment, the soft purr of the prehistoric Lizzie with its feeling of effortless power blended with the musical harmony of a thousand coal oil cans being taken for a ride, and the cushioned luxury of its upholstery

Clayburn Personals

Mr. and Mrs. Clark of the Clayburn C. P. R. station are on a holiday and Mr. Clark's place is being filled by Mr. Burdett.

Mr. Fred Healey has returned to Vancouver after visiting his parents here for some time.

Mr. Harold Thompson of Bellingham was a recent visitor at the home of his parents, Mr. and Mrs. Fred Thompson.

Miss Helen Slives of Sumas was a recent visitor at the home of her aunt and uncle, Mr. and Mrs. C. Yule.

Mrs. A. Kay spent the week-end in Vancouver as the guest of her daughter and son-in-law, Mr. and Mrs. Haigh.

Mrs. C. Yule spent the week-end as the guest of her sister and brother-in-law, Mr. and Mrs. Jack Slives of Sumas.

Mrs. T. Kirkpatrick has returned from Vancouver, where she spent a few days the guest of Mr. and Mrs. C. Warren and family.

Mr. Ralph Mander of Hammond visited his parents, Mr. and Mrs. C. Holbrook last week.

The Ladies' Aid held their monthly meeting at the home of Mrs. Fox on Tuesday last.

Sumas District

Commencing this week, the U.S. Customs office at Sumas will close at 10 p.m., these hours to continue for the winter. In emergencies the officers are available at any time of the night.

Mr. and Mrs. C. A. Watson are being visited by their daughter, Myrtle of Vancouver and their son, Jim of Youbou, B.C.

Charles Garrison, farmer, of Sumas, Wash., was killed last Wednesday, his wife and son painfully injured, when their car was struck by a N. P. freight train at the Everson-Nooksack crossing.

Several new residences are in course of construction at the Mennonite settlement, Yarrow. A new church 34x60 feet, with concrete basement, is also being built.

Mrs. Rachael Lamson was taken to the hospital last week, and is reported improving.

Mrs. W. Boley is visiting her daughter, Mrs. Embree, at Ladner, B.C.

WORLD HAPPENINGS BRIEFLY TOLD

Marie, of Roumania, most unconventional and perhaps loveliest and loneliest of Europe's queens, celebrated her 51st birthday on October 29.

It is announced that E. W. Beatty, K.C., president of the Canadian Pacific Railway, has accepted appointment to the Canadian Olympic committee.

During September, the first month of the apple-shipping season, \$9,476 barrels left Halifax for the overseas markets. This was more than double the exports of September, 1928.

Kaye Don, noted racing car driver, announces that an automobile in which he will seek a world's speed record, at Daytona Beach, Florida, has been nearly completed.

During his speech to the Canadian Club, while in Quebec, Premier Ramsay MacDonald confided to his audience that he proposed to make a trip to Hudson Bay, no matter who attempted to deter him.

Six men, jumping simultaneously from a 19-passenger airplane, demonstrated the possibility of safe descent from a disabled plane. The demonstration was made at Roosevelt Field, New York.

Lowest Infant Death Rate

Report Shows New Zealand Has Fewest On Record

"New Zealand's the best place in the world to be born. Babies born there have more chances of living than those of any other part of the globe."

That is Sir Carrick Robertson's way of expressing the fact New Zealand's death rate among infants is the lowest on record for any country.

"However, grown people don't fare much better in New Zealand than in other first rate countries," Sir Carrick added. "In the main health conditions are good, but we have some diseases that are peculiar to certain parts of the country, and these are quite a problem."

"Gout is, perhaps, one of our worst diseases. It is caused from a lack of iodine in the soil, and there are a good many stretches in New Zealand thus affected. The younger generation is being protected to a certain extent by being fed iodized candy at school and many of the adults use iodized salt to combat the disease. Cancer, too, is just as insidious in New Zealand as elsewhere."

Not Acquainted With Subject

The archbishop had preached a splendid sermon on the beauties and joy of married life. Two of the Brides waddled slowly out at the close of the service.

"Ah, 'twas a fine sermon his rivance was after tellin' us."

"Indeed it was. . . An' I wish I knew as little about it as he does."

Use Gopher Pelts

Gopher fur ranching may be the next development in Alberta. The Lethbridge Herald reports that an eastern firm is endeavoring to secure a large number of gopher pelts for experimental purposes in the fur trade, and a communication to that effect has been received by the Board of Trade.

Her Idea Of the Navy

Old lady (meeting sailor on country road): "Sir, do ye know my son, Jack, in the navy?"

Sailor: "Which ship is he serving in?"

Old lady: "What! Be there two?"

A financier is a man who can buy his wife a \$9 ball bearing washing machine and make her forget she wanted an automobile.

Asthma

is relieved by Minard's. Spread on brown paper and apply to throat. Also inhale.

MINARD'S "KING OF PAIN" LINIMENT

Stratford Players Coming

Famous Festival Company Is Again Appearing In Western Canada

Regina.—For an engagement of three nights, beginning on Monday, Nov. 11th, the famous Stratford-Up-on-Avon Festival Company, from the Memorial Theatre at Shakespeare's birth-place, will appear at the Grand Theatre, Regina, presenting in the order named, "Much Ado About Nothing," "Romeo and Juliet," "Julius Caesar," and "Twelfth Night."

The splendid artistic qualities of this organization are well known to players through the appearance of the company here last season, when an entirely different repertoire was presented. The plays on the present list are those that were revived at the Memorial Theatre last summer. The company is almost the same as last season, with only such changes in personnel as have been necessitated by the altered repertoire. Among the players are: George Hayes, Wilfrid Walter, Roy Byford, Eric Maxon, Gordon Bailey, William Calvert, Oliver Crombie, Kenneth Wickstead, Ernest Hare, R. Eric Lee, Jack Bligh, Geoffrey Wilkinson, C. Rivers Gadsby, Noel Tiff, Joyce Bland, Fabia Drake, Mary Holder, Olive Walter, Miriam Adams, Dorothy Francis and Maud Garth. Monday evening, "Much Ado About Nothing"; Tuesday evening, "Romeo and Juliet"; Wednesday matinee, "Julius Caesar"; Wednesday evening, "Twelfth Night."

Winnipeg Newspaper Union

PRINCESS LINES

A charming adaptation of Princess lines in black crepe satin that emphasizes slenderness through panel front and back of skirt.

The clever cut of bodice with slight blousing at either side and swathed effect through waistline, is especially lovely for woman of larger figure. The round neckline shows new lingerie touch in ecru Alencon lace collar, and is completed with tie that uses the dull side of crepe. The sleeves are ever so smart with flaring cuffs that fall over wrists.

It's an opportunity! Style No. 706 is designed in sizes 16, 18, 20 years, 36, 38, 40 and 42 inches bust. You'll find the making of this practical smart dress the most simple thing imaginable.

There are many other fascinating fabrics quite as suitable.

For office, classroom and general occasions, a feather-weight woollen in plum shade with collar of self-fabric finished with plum shade faille silk crepe binding which is repeated in tie, is captivating.

Transparent velvet in tobacco brown, silk crepe in black with egg-shell collar, printed velvet in wine red tones and midnight blue crepe Maroon chic.

Pattern price 25 cents, in stamps or coin (coin is preferred). Wrap coin carefully.

Newest Slot Machines

If you wish a "hot dog" in Germany just drop a coin in a machine, and out jumps the sausage and roll. The hot frankfurter vending machine has just been introduced. For the equivalent of two cents the device automatically delivers the sandwich and mustard.

Newspapers were the only material used for the whole of a house, with the exception of the frame work, the windows and the floors, built in Massachusetts by a married couple.

Just Right For Upset Stomach

For after-eating distress, gas, sourness and bloating, the quick and positive neutralizing action of Bismarck Magnesia has proved to be just right! Relief, certain and gratifying, almost instantly follows the very first dose—and a few cents worth obtainable from any good druggist, lasts for a long time.

Caught Him Off Guard

Plaintiff Lost Damage Case Through Cleverness Of Lawyer For Defence

A legal friend of mine told me the other day a good story illustrating the value of cross-examination in the hands of an expert at the game. At the time when the present Lord Birkenhead was plain Mr. F. E. Smith, he was retained by a tramway company in a running-down case. The plaintiff, a man of the laboring class, had had his arm injured, and he claimed that the injury was permanent and prevented him from working. If his case were correct, it was a case for heavy damages. Mr. Smith, however, was convinced that the man was exaggerating. The difficulty was to prove it. After several more or less irrelevant questions had been put and answered, Mr. Smith said to the plaintiff quite casually: "Would you mind showing the jury how high you can lift your arm since the accident?" The man, apparently with some difficulty, raised it to his shoulder. "Now," said Mr. Smith in the same casual tone of voice, "show us how high you could lift it before the accident." Up shot the plaintiff's arm, well above his head! The future Lord Birkenhead's insight into the man's mentality had won the tramway company their case.

Beer Brewing On Increase

More Beer Brewed In Canada Last Year Than Previous Year

More beer is being brewed in Canada. In 1928, gross production of breweries reached a value of \$60,910,398, an increase of \$1,116,187 over 1927. Net production value was \$40,172,912, as compared with \$34,056,725 in the preceding year. At the same time the number of establishments increased to 78, five more than a year ago, and capital invested moved up to \$67,148,686 from \$62,558,117.

By provinces, plants were divided as follows: Ontario, 36; British Columbia, 10; Quebec, 8; Manitoba, 8; Alberta, 5; Saskatchewan, 7; New Brunswick, 2; and Nova Scotia, 2.

Materials used in the industry cost \$20,737,486. Canadian malt accounted for \$7,409,992; foreign malt, \$1,961,820; bottles, \$5,926,056; cartons, \$1,515,371; and hops \$1,134,590.

Exports in 1928 had a value of \$5,148,065, a slight reduction from the figure of \$5,481,707, in the preceding year. Imports advanced to \$248,001 in 1928, from \$223,025 in 1927.

Demonstrates New Serum

Young Military Doctor Discovers Substitute For Blood Transfusion

The efficacy of a new serum, which is said to take the place of a blood transfusion, was demonstrated at the Pean Hospital, Paris, where the life of a motor-cyclist was saved after he had been badly hurt in an accident. The serum is the discovery of a young military doctor attached to a branch of the Pasteur Institute, in Hanoi, Indo-China.

Before the serum was tried on human beings, experiments were conducted in Paris at the Pasteur Institute. The serum was injected into a dog from which most of the blood had been drained, and the animal immediately revived and took food. The motorcyclist was successfully treated when he had already lost two quarts of blood.

B.C. Exporting Lead and Zinc

A large movement of 1,500 tons of lead and zinc concentrates from Field, B.C., will begin shortly to flow through the Port of Vancouver, the zinc to Japan and the lead to the United States.

Canadian Wheat For India

The first full cargo of Canadian wheat ever carried direct to India left the Port of Montreal on Tuesday, October 8th, being 252,698 bushels bound for Calcutta.

Poultry Pool Grows

Membership in the Manitoba Co-operative Poultry Marketing Association Ltd., Hartney, Man., has increased during its seven years of life from 1,000 to 11,000.

Both the Mediterranean and the Gulf Stream which flows like an individual sea in the Atlantic, are very salty and of a deep and beautiful blue in color.

In the rural districts of Sweden, every parish forms a self-governing community.

Corn Extractor

Canada's Sound Position

Prosperity Due In Large Measure To Agricultural Development

"We are all primarily conscious of the fact that this country, measured by any of the yardsticks by which the prosperity of a nation can be gauged, is a very prosperous country, notwithstanding disturbing stock markets and a rather unusual grain situation, both of which are, we hope, temporary," stated E. W. Beatty, chairman and president of the Canadian Pacific Railway, at a dinner given in his honor by the St. Catherine's Chamber of Commerce.

"There is, perhaps," continued Mr. Beatty, "no one reason to which we can attribute all the improvement in Canadian conditions in the last few years, but there is one which stands out above and beyond all others, and that is the impetus given by successive crops, large in volume or in money value. We hope the time will come when our prosperity will be said to be equally balanced as between agriculture and the development of natural resources and industry, but for the moment we are pre-eminently still an agricultural country and that when providence ordains that our crops shall be large we are almost inevitably prosperous."

Lighted Arrows Show

Direction Of Liners

Visible Signals May Largely Diminish Chances Of Disasters

Big liners in the near future may warn each other as regards the direction in which they are steering by means of large lighted arrows displayed on the bridge, following experiments carried out by the Royal Dutch line.

There have been many collisions owing to the international signals by steam whistle being misunderstood by vessels approaching each other on the high seas.

The new optical system installed on the steamship "Batavier V" consists of three arrows conspicuously placed on the bridge. One is horizontal, with the point to port another is horizontal, with the point to starboard, and the third is vertical, with the point upwards. When lighted, the arrows signify respectively: "I go to port," "I go to starboard" and "I continue my direction."

Both Dutch and British authorities are closely watching the experiment well, in view to the general adoption of the plan.

Standard Grades For Turkeys

Inter-Provincial Conference On Turkey Breeding Held At Saskatoon

An inter-provincial conference on turkey-breeding approval work at the University of Saskatchewan, when representatives of the three prairie provinces were present, ended recently.

Definitions of the "A," "B," and "C" grades of turkeys established two years ago in Saskatchewan remain unchanged and an interpretation of those standards, uniform for the three provinces, was arrived at. These grades take into consideration not only the market qualities of the birds, but include the type, conformation and plumage, in accordance with the American Standard of Perfection. An "A" grade turkey, according to this standard, will be able to meet keen competition in the show ring.

In grading, weight is taken into consideration and an allowance made for the time of the year at which the birds are graded. Grade "A" calls for males weighing 25 pounds and females of 16 pounds as at December 15; grade "B" requires 23 pounds and 15 pounds; grade "C" requires 20 pounds and 13 pounds.

Shipment Of Pure Bred Rams

Four Carloads Shipped From Ontario To Western Canada Points

What is hoped to be the first of a series of shipments of purebred rams from Ontario to the western ranches has just reached the prairies. The four carloads of 275 good purebred rams included Lincolns, Cotswolds, Leicesters, Hampshires, Southdowns and Cheviots, all selected by officials of the Canadian Co-operative Wool growers Limited, who, along with the wool committee of the National Research Council, have been active in promoting sheep and wool interests in Canada. In the past large consignments of these sheep have been sent to the Western States for breeding with the native stock.

Adding In Music

The music teacher was trying to impress upon her pupils the meaning of F and FF in a song they were about to learn. After explaining the first sign, she said: "Now, children, if F means forte, what does FF mean?"

"Eighty!" shouted one enthusiastic pupil.

Used His Own Judgment

Old Lady (to druggist): "I want a box of canine pills."

Druggist: "What's the matter with the dog?"

Old Lady (Indignantly): "I'll have you know my husband is a perfect gentleman."

(The druggist put up some quinine pills in profound silence.)

Some men are like silver-plated knives; they look bright but are very dull.

Send for FREE TRIAL package of 6 cigarettes. Canadian Distributors: Lyman, Ltd., Dept. BB-2, 286 St. Paul St., West, Montreal, Canada.

Dr. Guild's GREEN MOUNTAIN ASTHMA COMPOUND

One Form Of Plundering

Usury In Its Worst Form Is Interest On Inflated Capital

The Toronto Telegram gives the story of a certain lawyer in the United States who ten years ago acted as counsel in a law-suit. He turned his fee of \$10,000 into stocks in a gas company or something of that nature, and added \$7,500 more to gain control. Then by manipulation and splitting of shares and by getting control of shares in allied concerns, he increased his capital to no less than \$55,000,000; on which he draws interest. The figures may not be trustworthy but they illustrate a plan of financing that is all too common these days. And of course everything was within the law and therefore the manipulation was not looked upon as a crime. Were it a private transaction it would be called plain theft, for the consumers of gas were robbed—every one of them. Yet, because of lack of state supervision this form of plundering went unchecked and the man making the profit was called a financier. The worst of it is that many men envy him, and just wish they could have had an opportunity to do the same thing.

There is such a thing as legitimate interest on money borrowed or loaned, but in all ages and in all lands usury has been condemned—yet practised. Usury in its worst form is interest on inflated capital. Think of this, that the people in one state pay over seven cents for electricity when a neighboring state pays only two. There is need that governments examine into rates of profit in all money-making concerns with a view to protecting those who are borrowers and consumers.

This, of course, is only one side of the picture. The other may be presented again.—Western Home Monthly.

Find Body Of Prospector

Mounted Police Locate Body In Barren Lands Of Far North

The body of Joe Rutherford, old time prospector, who lost his life one year ago when a blizzard swept the barren lands of the far north, was found by Royal Canadian Mounted Police, it became known recently.

Tom R. Cowan, of Toronto, Rutherford's partner, who suffered so greatly in the same blizzard that both legs had to be amputated, was notified that natives and Mounted Police had located the body where he had directed Staff-Sergeant Joyce, at Chesterfield Inlet, to hunt for it. The body was buried where it was found.

Cargo Of No. 1 Hard Wheat

What is believed to be the first full and exclusive cargo of No. 1 hard wheat ever taken out of the twin ports of Port Arthur and Fort William was loaded from Saskatchewan pool terminal No. 7 into a tow barge on Saturday, October 12th. It consisted of 200,000 bushels consigned to Erie, Pa.

Astronomers know whether a star is young or old merely by the color of its light.

Pioneering In the Peace River Country

Offers Less Hardships Than Suffered By First Prairie Settlers

The Peace River country, as anyone who has visited it knows, is hardly to be regarded as a pioneering country at all. The first thing that strikes the visitor, and the impression that strengthens wherever he travels in the whole Peace River country, is that this is not a new but a finished agricultural section. He is impressed immediately by the substantial farm homes and buildings, by the well-built rural schools, hospitals and churches, by the fact that the telephone wires have been carried everywhere, and that the ordinary amenities of rural life have been provided in a remarkably short time. The Peace River country has gone quite as far in these directions as have most of the older settled sections of the West. The roads are good, substantial bridges have been built, everything in fact has been done in a very few years that could be done for an agricultural community ordinarily in 50 years.

Pioneering in the Peace River country does not begin to compare in hardship or difficulties with the pioneering that was done a century ago in Ontario or Quebec, or the Maritime Provinces. It is attended with much less hardship than was suffered by the first settlers on the Prairies.—Winnipeg Tribune.

This May Be 1933

No One Is Really Sure What Year We Are Living In

It is generally assumed that we are living in the year 1929, but the year may really be 1933, or even later.

This fact is indicated by a record of an eclipse of the moon. Bible history says that Christ was born during the reign of Herod the Great. But Herod died in the spring of 4 B.C., the exact date being fixed by a lunar eclipse which took place the night before his death.

Obviously, therefore, Jesus might have been born not later than 4 B.C., and possibly earlier.

The church has no definite knowledge of the date of Christ's birth. It fixed the year, month and day of the month arbitrarily.

Astronomers are able to calculate the dates of past eclipses as accurately as those of the future, and so have determined the very day and hour of the eclipse that ushered Herod the Great out of this life.

Nature's Speed Artist

Insect Size Of Bee Travels 815 Miles Per Hour

The fastest known bird is the spine-tailed swift, which reaches the speed of 220 miles an hour over the mountains of Asia; the tarpon, of Florida, the fastest fish, can cover 80 miles in an hour; and the Indian cheetah, the speediest animal on legs, is credited with 60 miles per hour. Man has beaten all these records; but he is still second to an insect, a fly no bigger than a bee which has been recorded to do 815 miles per hour.

New Bridge For Vancouver

Increasing traffic, both freight and passenger, in the vicinity of Vancouver, has decided the British Columbia government to construct a new bridge across the north arm of the Fraser River from Vancouver, to be ready by the spring of 1930. It will be 130 feet in length.

New Scheme To Aid Settlers

"British Family Reunion Association" Has Many Prominent Members

With the object of giving a powerful stimulus to the immigration to Canada of British colonists who can be satisfactorily settled, an entirely new organization has been created by the Department of Colonization and Development, Canadian Pacific Railway.

The name of the new body is, "The British Family Reunion Association." Its activities will extend throughout the Dominion, and it is understood that the forces of the Canadian Pacific, the Hudson's Bay Company, many other organizations and influential Canadians will be joined in this effort to supply new emigration.

The heads of British families in Canada, while earning enough to properly support their families here, are unable, within a brief period to have sufficient money to bring their families to Canada, due to the fact that they have had to support themselves here and their families in Great Britain at the same time, will be assisted. Then there are families who have become comfortably established in Canada and who desire to help relatives and friends in Great Britain to avail themselves of the opportunities which Canada has to offer, not only for the sake of the latter, but also for their children. The new association is designed to assist in the fulfillment of the wishes of the one and the ambitions of the other.

An Early Tractor

Thirty years ago, on September 6, 1899, a steam tractor was demonstrated near Morris, Man. This outfit, travelling at about 14 miles per hour, pulled ten ploughs, cutting a twelve foot swath to a depth of four inches. A roller was attached behind the ploughs, and it was claimed that a perfect seed-bed was created from raw prairie without back-setting.

A Long Lived Horse

A horse 43 years old was recently exhibited in Germany. It is said that this horse has done all the work on a 16-acre farm and made a daily trip of 18 miles with a light wagon since three years of age.

Noted For Honesty

The honesty of the British public is well known in the British Museum, according to the superintendent of the Reading Room, Mr. Sladen, who has just retired. He states that it is a very rare occurrence to lose a book.

WINDOLITE The Improved Glass Substitute

MADE IN ENGLAND

WINDOLITE stands for 100 per cent. sunlight. It makes light but strong windows for cattle sheds, dairy stables, poultry houses, brooders and all out buildings. It is economical, unbreakable, flexible and is easy to cut and fit. It is now being successfully used for sunrooms, verandahs, schools, factories, hospitals, sanitariums, hot beds, plant coverings and greenhouses. It keeps out cold—will not crack or chip—cuts with an ordinary pair of scissors and is easy to fit. WINDOLITE is supplied in rolls any length but in one width of 36 inches only. A square yard of WINDOLITE weighs about 14 lbs., while a square yard of glass of ordinary thickness, weighs about 135 to 120 lbs. The improved WINDOLITE requires no varnish. WINDOLITE is made in England.

Price \$1.50 Per Square Yard, f.o.b., Toronto.

The Singing Fool

By HUBERT DAIL
Copyright, 1928, Warner Bros. Pictures, Inc.

SYNOPSIS

Al Stoebe, singing waiter at Blackie Joe's New York night club, wins fame as a composer of popular songs. He marries Molly Winton, a ballad singer, and makes her famous, too. When their baby, Junior, is about two years old, Molly elopes with John Perry, Al's best friend, taking the child. A week later Al learns she is at a New York hotel, ready to sail for France that afternoon. He calls her on the phone, and begs for the chance to say goodbye to Junior. Molly consents, so Junior is taken to the park entrance. It is a tragic farewell, for Al adores his boy. Junior says, "Do you feel bad, daddy?"

CHAPTER XX.

"I'm all right, Junior," said Al. "No, I don't feel bad. I'm just awfully happy to see you. I'll tell you something—you're going far away to another place on a great big boat. Take care of mother and don't let anything happen to her. Be good to her. And remember—you'll see daddy again; we must both wait for that time."

In the distance the nurse-maid was consulting the chauffeur as to the time. He looked at his watch and decided they should be getting back to the hotel. Al looked up to see the severe-faced nurse standing before him.

"I'm sorry," she said firmly, "but it's time for the young gentleman to return to his mother."

Junior turned on her quickly. "But I don't want to go."

The nurse tried to smile, but Junior continued with baby sternness. "If you take me away so soon I won't like you."

Al rose, gathering Junior in his arms. "Sh-h—Junior. It isn't nurse's fault that you have to go. You must be a good boy, every way, every day." Then Al turned to the nurse. "I'll bring him over to the car. Will you please go on ahead?"

The nurse preceded them, while Al made that one hundred-foot walk to the car as long as possible. Would this really be the last time he ever saw Junior? Perhaps not, but it was quite possible that Junior would be a strapping youngster the next time they came together. If so his adorable baby sayings and his sense of baby gaiety would be gone. His sweet, confiding ways would be replaced by a boyish self-sufficiency. He might even forget his father entirely.

These thoughts travelled like burning darts through Al's mind. Was it humanly possible for him to give up this little bundle of humanity? Could he live afterward? And then came the thought—take Junior by force, jump into taxi and drive off with him. For a moment this idea persisted with startling intensity. It would be so easy, and he would be justified in doing it!

But, no, Al just couldn't do it—he wasn't made that way. He was kind, generous, chivalrous. He loved Molly in spite of what she had done to him, and he knew she adored Junior. No matter how Molly had hurt him, Al's nature would not let him pay her back in kind. Let Junior go with her and perhaps she would relent and return with the child within a few months. He knew she would take good care of his son.

Al kept his facial muscles firm and controlled until the instant of saying goodbye and putting Junior into the car. Then he had to turn his face away again as he pressed Junior to him. He said haltingly: "Don't forget, Junior, your mother loves you—you're going to be awfully

happy with her. Don't worry—about daddy."

Even the strange nurse was touched by this father's tragic face. Then Al, afraid of breaking openly, quickly passed Junior to her in the car. The motor purred, the door closed, the Rolls-Royce started to move. Al saw Junior's face, dim in the limousine's interior, gazing at him in wide-eyed, troubled wonder.

Al was smiling. It was a desperate effort, but Junior must remember him that way. As the car gained momentum the baby face appeared at the rear window; Junior was waving a frantic farewell. Al started to walk after the car—faster, faster. Now he broke into a run. His heart was breaking, but still he smiled and answered Junior's wave. He stumbled and almost fell, then caught himself up and ran the faster. But the little face at the window became blurred by the intervening distance and suddenly the car itself disappeared down the crowded Avenue.

When Al definitely lost sight of the car he stopped in his tracks. People on all sides were staring at him, conscious that he was passing through a terrible ordeal of some kind. As long as Junior was in sight he had kept up a brave front; now his figure sagged, and he stumbled blindly toward the nearest bench.

He sat with his arm flung across the top of the bench and his head in his arms. He felt that he could not bear to face the life that moved around him, so steadily and relentlessly, a law unto itself and ignoring his despair. He heard the steady hum of the motor cars up and down the Avenue, carrying women home from shopping tours, bridge parties and tea dates, carrying men home from offices. Faintly he heard the footsteps of the pedestrians who passed only a few feet away.

Many curious glances were directed his way. If he had been a down-at-the-heels derelict of the great city he could have sat for hours in that position without attracting any notice at all, but it was unusual to see a fashionably dressed young man with a silver-topped walking stick across his lap sitting on a bench just outside the park's stone wall in a posture suggesting despair. Two girls, passing close by, giggled, believing Al drunk. But when he raised his eyes and stared at them vaguely they relapsed into silence and hurried away.

Finally he stood up and turned back toward the bench where he had sat with Junior. Reaching it, he stepped close and touched it. He must always remember this bench, the scene of his good-bye to Junior. He took note of the fact that it stood beside a small, bare oak tree with a curiously gnarled trunk.

The winter day was darkening already; nurses from the fashionable houses along the Avenue were bringing home their baby charges who had been playing all afternoon in the park. There was a procession of them—babies in perambulators, little tots of two, three and four, carried in their nurses' arms or trotting along beside the women. Many were dressed similarly to Junior. Some looked very like him. And Al stood, slightly away from the sidewalk, peering eagerly into the little faces, listening to the chatter and childish laughter. These youngsters—they were going home to happy nurseries, to fathers and mothers who loved them and were united.

How uncanny it was, thought Al, that this procession of babies passed him just at this time, when he had lost Junior. He stood like a statue until long after the last youngster had disappeared and the last remonstrating tone of the chattering French nurses had died away. Then he turned south toward the city's skyscrapers, already ablaze with light in the distance. Skyscraper apartments—home—reaching into the cold blue winter evening sky! Everything he saw brought comparisons emphasizing the pain of his loss.

He walked slowly, asking himself—Where was he going? Back to the apartment where Celeste, the maid, waited with pitying eyes, back to Junior's nursery? No, he couldn't do that. He must tell Celeste tomorrow that he was giving up the apartment. He would go to a hotel to live.

But what were his plans? He must have plans, something to engage his interest, or he would go crazy with the pain of his loss. That was Al's big problem at the moment, and he knew it. Without plans he would be continually whirling in an emotional chaos.

He had plenty of money—that didn't worry him. And he knew that Molly had salted away every-

thing she had earned as a revue singer. She was amply able to provide for Junior. Besides, John Perry had made himself rich as a booze racketeer. No, the money angle could be set aside.

(To Be Continued.)

Artisans Pray For Skill

Season Of Kan Mairi Observed In Japan By Workmen

The Fude Temple will soon be a ghostly scene of devotion attended by hundreds of Japanese artisans in their snow-white kimonos, for the season of Kan Mairi approaches.

This is the season when all good workmen of Japan offer prayers to their guardian gods for greater skill in their profession. When darkness sets in the pilgrims begin to arrive at the temple in a constant stream from all sections of Tokyo and its suburbs. Each is dressed in an unlined white cotton kimono. Their heads are tied with white strips of cotton cloth and their legs are protected with white cotton leggings. Each with a lantern in his hand runs for a long distance to the temple, jangling the bells tied on his hip. The nights are usually cold and they run to keep warm, muttering prayers for "repentance and purification."

When they arrive at the temple, the pilgrims resembling a conclave of the Ku Klux Klan, proceed immediately to the sanctuary and offer prayers, clapping their hands to attract attention of the gods.

Then they go to the well nearby the temple and bathe, throwing many bucketfuls of cold water over themselves as they run over the cold stone pavement. When this is done they return to the sanctuary and, throwing coins in the offering box, offer new prayers for improvement of skill in their work. They may be mat makers, masons, carpenters or whatnot; some are women and others old men.

Upon the conclusion of these prayers they again light their lanterns and hurry home.

Recreation Should Be Taken Systematically

Mrs. Thomas A. Edison Urges Need Of Outdoor Life

In the opinion of Mrs. Thomas A. Edison, people who lack contact with outdoor life cannot be really happy. The wife of the inventor expressed the view in a message read at a session of the National Recreation Congress at Louisville, Kentucky. For fifteen years she has been a director of the Playground and Recreation Association of America, under whose auspices the congress was held.

"A curious thing about modern life is the way so many of us take our recreation in doses, as though it should be a sort of medicine instead of a part of daily life, something as necessary to existence as food," the message said. "We go on for days and sometimes weeks without considering play; then comes a holiday or a week-end and we play with a vengeance. After a holiday many men and women return to their work more tired than they were before. Children are overstimulated by the pace which grown-ups force them to follow in their own thoughtless pursuit of amusement."

As recreations that best afford the relaxation and self-expression she said are needed in modern life, Mrs. Edison named gardening for both children and adults, nature study and music.

Fifty Years Hence

A news item reveals that more than 1,000,000 children are transported to and from school in buses these days. Biographers of presidents 50 years hence no doubt will record: "He trudged to school daily in a six-cylinder bus, a distance of 15 miles."

Persian Balm is alluringly fragrant. Adds a charming refinement to the most finished appearance. Creates and preserves complexions of surpassing loveliness and texture. Softens and whitens the hands. Cools and dispels all irritation caused by weather conditions. Swiftly absorbed by the tissues leaving never a vestige of stickiness. A peerless toilet requisite. Invaluable to all women who care for elegance and distinction.

West Coast Fisheries

A thousand fishermen and nearly a hundred fishing boats are about to open the herring season at the herring grounds off Nanaimo and on the west coast of Vancouver Island.

Canada's Potato Crop

The potato crop of Canada this year is estimated at 70,658,300 bushels, a decrease of about 16 per cent. compared with last year's crop.

The earth's core is a sea of dense liquid glass on which oceans and continents float and slide, according to Dr. Reginald A. Daly, of Harvard University.

WHAT WILL IT DO?

Women are saying: "Pinkham's Compound keeps me fit to do my work." "I was nervous and all run down. Now I eat better and sleep better." "It helped my thirteen year old daughter." "I took it before and after my baby was born." "I am gaining every day."

Lydia E. Pinkham's Vegetable Compound

A Complex Question

Creating Canadian Nationality Not Easy Says Hon. Rinfret

Steps will be taken by the federal government at the earliest opportunity, either by means of legislation or through the next census, to establish clearly a distinction between British subjects born in Canada, and those who have come from other parts of the British Empire or from foreign countries, states Hon. Bernard Rinfret.

The secretary of state declared that the government will endeavor to create a Canadian nationality, taking into account that citizens of this country are part of the British Empire, and that as such, wherever they go in foreign countries they can be considered only as British subjects.

"The question is a complex one," said Mr. Rinfret, "which has engaged the attention of our predecessors for many years. Though we are an autonomous nation, we are nevertheless a part of the British Empire and not an independent nation. Therefore, as long as we retain the British bond, as long as foreign countries will accept us only as British subjects, we cannot give Canadian passports and have a full status as Canadian subjects."

"The most that can be done, is to make a distinction between the Canadian born British subjects and those who have come from other parts of the British Empire, or who have come from foreign countries and have been naturalized British subjects here. That will be done as soon as possible. The question is now in the hands of the hands of the statistcal department of the Ministry of Commerce, which will report in the near future."

HOW TO RELIEVE CHILDREN'S COLDS

Avoid Serious Results By Using Baby's Own Tablets

When a child shows the first symptoms of a cold, such as sneezing, redness of the eyes, clogged or running nose, prompt measures for relief may avert serious results. Mothers should always have on hand some simple safe and effective remedy for immediate use.

Baby's Own Tablets act quickly, contain no opiates or narcotics, are tasteless and harmless. Concerning them Mrs. Jos. Cadieux, Holyoke, Mass., says: "I have used Baby's Own Tablets for my children and find them a very satisfactory medicine. When my little boy had a cold I gave him the Tablets at night and he was well the next day. I gave them to the children for constipation and they are always benefited. I think Baby's Own Tablets are much easier to give a child than liquid medicine. I strongly recommend all mothers who have young children to keep a box of the Tablets in the house."

Baby's Own Tablets are sold by all medicine dealers or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

Has Become Callopie Fan

Staff Pianist Of National Broadcasting Co., Defends Queer Instrument

The loud and brassy callopie, defamed by music lovers from the day of its creation, at last has a defender. He is Milan Smolen, National Broadcasting company staff pianist, who is the player of the only callopie to have shrieked and shrilled for the radio.

Smolen, because of his passion for the grotesque instrument, does not remove himself from the ranks of music lovers. He merely differs from almost everyone else. The callopie was introduced to the air by the Dixie Circus, broadcast over the NBC system, and is used mainly to give the circus atmosphere.

When the callopie first arrived musical directors cast about to find a man to play it. Practically all the musicians disdainfully refused to even try, but Smolen volunteered. After the first encounter with its key-board he became a callopie fan, and whenever he finds the instrument in a studio not in use, he steals a few moments for practice.

"The callopie has many possibilities," he declared. "With a few refinements in tone and the elimination of power noises, one could really do a lot with it. Of course, its range would have to be extended, too."

"The callopie player has a tremendous thrill in the effect he gets with a little effort. If I should press the keys hard enough, I could be heard three miles away. You can't do that with any ordinary piano."

Test For Auto Drivers

If you can drive a car at 50 miles an hour and knock toy balloons off posts with a stick you are competent to run an auto. So declare officials of Berlin, Germany. The idea was started as a form of practice for auto polo players, then was used to develop steady nerves for other drivers in order to cut down the great number of auto accidents on the highways.

Crabs' ears are on the first joint of their smaller pair of "feet." They resemble tiny swellings.

The game of billiards is very popular with teachers, professors, and other professional men in Japan.

The early native of Hawaii had beautiful dishes of wood, carved and polished.

Use Minard's Liniment in the Stables.

For COUGHS, COLDS, Bronchitis & Influenza

A Law-Abiding Nation

English Obey Law and Support Authorities In Enforcing Same

No nation, not even the German, is more law-abiding than the English. Not only does the individual obey the law, but he supports the authorities in enforcing obedience on his neighbor.

"Not only is the criminal class in England small, and, to judge by the latest criminal statistics, diminishing, but the criminal himself shares with his more respectable neighbors the law-abiding instinct of the race," writes Geoffrey Layman, in the November Harper's Magazine.

"The safe-breaker," surprised in the midst of his nefarious operations by the solitary policeman on his beat, may in nine cases out of ten be expected to "go quietly." He is himself unarmed, and he knows that the policeman is unarmed, except for a "truncheon" or club, so carefully concealed that I, the average citizen, have never even seen one in the hands or anywhere about the person of a policeman, although I know that it is there. There is a recognized etiquette in these matters. If the safe-breaker or burglar can finish his job and get away unseen, the trick is his; but if he is so clumsy as to allow the policeman to come upon him unawares, he murmurs "It's a fair cop, gov'nor" and submits. No English policeman, unless he is on plain clothes duty, or on some very rare occasion when there is strong probability that he will be met, almost certainly by aliens, with violent and murderous resistance, is ever armed with any weapon more lethal than a truncheon; and it is very rarely, and usually only in street rows, that he has occasion to use even that. He has no need for anything more."

Holland Builds Largest Locks

Third Longer and Half as Wide Again As Panama Canal Locks

The most important of the numerous canals in Holland is that which since 1876 has connected Amsterdam, Holland's second seaport with the ocean. With the gradual increase in the size of the ocean-going vessels, says the Netherlands News Bureau, this canal had to be widened and deepened until at present it belongs, according to its dimensions, to the same class of large, internationally known artificial waterways as the Panama and Suez Canals. The North Sea canal has only one set of locks. These separate the turbulent waters of the North Sea from the calm, unruffled surface of the waterway and the many neighboring smaller canals and ditches. The locks are located at the coast near the town of IJmuiden, one of the important fishing centers of Holland.

As the canal has grown, so have the locks. Those in use at the present time admit ships of about 20,000 registered tons to enter the canal and thus reach Amsterdam. The ever increasing tonnage, especially of the modern liners, made imperative the construction of new locks which would be able to accommodate ocean vessels of any size. The locks have been under construction for a number of years and are expected to be ready early in September.

They will be the largest locks in the world; in length they exceed the locks of the Panama Canal by one-third, in width by one half. The largest ships afloat, the Leviathan and the Majestic, will be able to pass these locks without any difficulty. The preliminary depth of thirty-eight feet will give to the canal a profile with an area of about 14,000 square feet. This is more than the Suez Canal and a little less than the Panama Canal.

The gates weigh nearly 1,200 tons each. They are opened by rolling them back into recesses of exactly their size in the north wall. As no dry dock is available in the neighborhood which could accommodate the gates in case of necessary repairs the recesses had to be fixed up as dry docks. There are two gates in the western end of the lock chamber, one of which can be used as a reserve lock to replace either of the other two. The lock chamber can be filled in less than seven minutes. When the tide is very high it will take a little longer. The whole lock is operated electrically.

Test Was Successful

New German Device Drives Car By Liquid Gas

A new type of automobile, with liquid gas as the propelling agent, has been successfully tested at Essen, Germany, by Max Valler, the inventor.

The car was set in motion by the force of the loud sputtering escaping gas from three steel tubes attached to the rear of the driver's seat. Speed and halting the car was controlled by opening and closing the escape valves.

The car reached a top speed of about 37 miles an hour, but the inventor said that with perfection of the method he expects vehicles to surpass all speed records, and predicted that the method would revolutionize the motive power for airplanes.

Canada's Grain Grading System

Is Regarded By Wheat Buying Countries To Be Best In The World

More than 90 per cent. of the wheat crop of Canada this year comes within the statutory grades. Leading agriculturists agree that its protein content averages 14 per cent. though there is some that runs as high as 19 per cent. While not wholly perfect Canada's grain grading system is regarded by the principal wheat buying countries to be the best in the world, according to the Dean of the Faculty of Agriculture, of the University of Saskatchewan, Saskatoon, who was a member of the commission which toured Canada taking evidence regarding the marketing and handling of the wheat produced in the Dominion.

Will Ship Coal Samples

Carload samples of coal from various British Columbia mines will shortly be forwarded to Ottawa, where arrangements have been made by the Department of Mines to test and tabulate the qualities of each coal for the purpose of designating the uses to which each coal is best suited.

Worms cause fretfulness and rob the infant of sleep, the great nourisher. Mother Graves' Worm Exterminator will clear the stomach and intestines and restore healthfulness.

Saved Amending Constitution The recent judgment of the privy council enabling the Federal Government to name women to the senate has rather pleased the Dominion cabinet. Hon. Fernand Rinfret, secretary of state, said in a newspaper interview. The government welcomed the decision, he said, because otherwise it would have been necessary to amend the constitution in order to render women eligible to the Upper House.

There are more than 3,500,000 dogs in France.

Stop falling hair with Minard's Liniment.

Head Colds relieved with vapors

SNUFF a little Vicks well up the nose or melt in a spoon or cup of hot water and inhale. Medicated vapors reach the air passages direct. For other cold troubles rub Vicks on throat and chest.

Little Helps For This Week

"For the Lord God will help me."—Isaiah 1. 7.

Be but faithful, that is all; Go right on, and close behind thee There shall follow still, and find thee, Help, sure help!

—Arthur Hugh Clough. What I can do with my single arm may be mean enough; but that is not the question. The thing to consider is, what can I do with God to help me? And the difference of the one and the other is the difference between a man trying to push a train of cars up a grade by his single puny strength, and the same man on a locomotive with the steam up, moving the whole mass by a turn of the wrist.

—Robert Collyer.

A Clever Goose

A bright light of the goose world, in England, is Jimmy, a goose owned by a South Essex miner. Leaping through a hoop, washing his face, toe dancing and jumping over his owner's arm are some of the tricks he boasts of. He partakes of his meals sitting in a high chair at the table and his manners are said to be perfect. He also stands at attention and salutes whenever the national anthem is played.

The city of Edmonton, Alberta, is to have a new immigration hall for the convenience of immigrants, to cost \$65,000.

A greyhound can travel a short distance at a speed of 35 miles an hour.

THEY SAY Cow Clipping Pays!

A CERTAIN farmer wanted the facts about clipping cows so he wrote us for names of those owning clipping machines. He wrote them. Now he himself is so pleased with the Stewart clipping machine he sent us the letters which made him decide the clipping machine is a good investment. Here are some of them:

Vankleek Hill. "I think a clipping machine is a sound investment, paying for itself—yes, ten times its price in one clipping. Why? Because it eliminates the lice nuisance and naturally it takes less feed to keep cattle in good condition."

Bowmanville. "It is the easiest way to keep cows clean. With the old hair off the lice do not bother. A farmer cannot afford to keep cows and not clip them, is my experience."

Tavistock. "It certainly reduces bacteria. It is a good investment to have the machine because it keeps down all the dirt and the milk keeps a lot better."

Aylmer. "We have clipped our cows now for the last ten or twelve years. It sure does away with the lice and when you get rid of the lice the cows milk a lot better. It not only keeps the manure from clinging to their hams, but when the udder is clipped dirt don't stick to it and get in the milk. The cows look a lot better to sell."

HOW TO CLIP COWS

Manure, the principal source of bacteria, cannot collect and at milking time rub off into the pail if hair is under, under, flanks and tail is kept clipped short all winter. Lice seem to congregate along the spine, which explains why some tail to ears. Farmers who have warm stables and drinking water inside, usually clip their cows all over in the fall.

Buy a clipping machine and make more money from your cows—make less work.

Stewart No. 1 Clipping Machine is easy to use and anyone can clip with it. Strong, sturdy, easy-running and will last for years.

At your dealer, \$15.00. Satisfaction or money refunded.

Don't Want Jubilee Hall Made a Roller Skating Rink

Representatives of the Masonic, Eastern Star, Canadian Legion and Native Son organizations met with A. S.M. Recreation Association directors on Monday evening, for the purpose of discussing plans for improving the community hall, and financing this work by promoting various activities during the winter season.

Proposals were made to the directors for installation of a skating rink floor by two gentlemen who are at present operating rinks in Mission and other Valley towns. They proposed using the hall on a profit-sharing basis for six weeks, or until the present floor was worn out by the skating, then to lay a hard wood floor and operate the hall as a roller rink until one-half the floor cost had been paid by the Jubilee Association from its share of profits. The meeting did not favor turning over the hall for this purpose at present.

In response to a letter of application, it was decided to give use of the hall to the Boy Scouts and Cubs organizations at the nominal rental of \$5 monthly. The boys will use the hall on Tuesday evenings from 5 until 9, and their leaders take responsibility for care of the property.

As representative of the Women's Auxiliary, Mrs. Plaxton reported decision of the ladies to hold a whist drive in the Alameda store on Friday, December 13, and invited the directors to attend. To raise funds, a plan had been proposed, Mrs. Plaxton said, to launch a lottery for a new Ford automobile, tickets to be \$1 each. While appreciating the offer, the directors, after some discussion, recommended that the ladies re-consider their decision to raffie an automobile.

A bill, which included items of \$6 a night for janitor service, provoked criticism, the outcome of which was instructions to the secretary to call for tenders for the position.

L. Waddington, on behalf of the Native Sons of Canada, Sumas Prairie Assembly, in extending goodwill to the Association, referred to the original Jubilee hall project, as a "community movement" in which his organization was an active sponsor, and he favored retirement of stockholders by refund of their money, and financing of the project on a community basis. Mr. Webster explained his presence as representative of the Masonic Lodge, in response to an invitation by the hall directors.

Born—To Mr. and Mrs. B. Mutch, a daughter in Lacombe, Alberta.
Reeve Campbell, Postmaster Owens, and N. Hill attended the F.V. Associated Boards of Trade meeting in Ladner today. The Sumas land sale will be discussed.

Matsqui Sees Fast Basketball Games

Basketball takes major place in sporting interest at Matsqui this year, and some exceptionally fast games have been witnessed in the village hall recently.

One of the liveliest this season was attended by fans last night, when Matsqui Senior team played at home to a well-trained aggregation from Aldergrove. Although the boys were handicapped to some extent in their combination play by the rather small hall, the game developed plenty of excitement, both visitors and home boys doing occasional clever shooting. The game was more keenly fought than the score, 39-13 in favor of Matsqui, would indicate.

First game of the evening was between Abbotsford Intermediates and Matsqui Juniors, the visitors losing by 14-9.

Headline attraction of the evening was obviously the game between Abbotsford and Matsqui Old Boys, and this responsibility was taken seriously. Play opened with plenty of fervor, the Milltown bunch, with two good forwards, aggressively working up the score, basket after basket, end of the second quarter finding them leading. They were unable to hold this advantage, however, Matsqui showed better stamina, and gained by numerous fouls and breaches, which were strictly called by the referee, who almost blew his front teeth away, so continually was his whistle at work. Every few seconds play was arrested, mostly through slight of long-forgotten basketball rules, one of the visiting players calmly placing a penalty shot over his own basket, and others, each in some special recreative leaning, providing a varied program of soccer, rugby, baseball, catch-as-catch-can and Greco-Roman wrestling. That the exponent of fistic self-defence also participated was evident by Johnnie Lundstrom's damaged nose and the bruised eye of another player.

But the game was better basketball than played in Abbotsford by the Old Timers last week. Waddington and French made several difficult baskets, combining in some effective forward playing. While Plaxton, Weir, and Shore survived the whole game, the lesser lights of the Abbotsford basketball firmament were allotted periods

of play by Captain Plaxton according to their respiratory condition, and the exigencies of the game. Both teams played with a spirit of determination to win, and everything was friendly and as it should be.

The score was 17-14 in favor of Matsqui.

Matsqui's line-up included, Frank Beharrell, Alex. Beaton, John Lundstrum, Alec. Houghton, Dr. Wood, W. Paterson, C. Bell, G. A. Kerr, Abbotson, J. M. Rowley, E. Plaxton, C. Weir, M. Shore, R. Ralston, E. Porritt, G. Heller, L. Waddington, V. French, H. L. Atkins.

Referees were H. Hughes and B. Kennedy. The hall stage was overcrowded with fans, who also lined the sides of the hall in such numbers as to cramp the play. Door receipts were about \$16.

Results of games played last week: Senior girls, Matsqui 36; Dewdney 13. Junior boys: Matsqui 17; Dewdney 15.

Report of South Fraser district conference of Womens Institute was received by the Huntingdon Institute on Wednesday afternoon, when the members met at the home of Mrs. W. J. Fraser. After the reports were accepted, the matter of destitute local cases were taken up. It was decided to send parcels to hospital cases and residents impoverished by fire, and other causes. The discussion of forming a girls' basketball club and a judging club from the juvenile winners at the local fair took place.

POLICE COURT

Two local girls, aged 15 and 16 years respectively, were committed to the provincial Industrial Home by Magistrate Pratt last week, for a term of two years. This decision was made after consultation with Rev. Thos. Menzies, superintendent of the Department of Neglected Children, Victoria, who came here to personally investigate the case in conjunction with the provincial police.

W. Belledune paid fines totalling \$82.50 in Magistrate Pratt's court recently when convicted of four infractions of the Game Act. Warden Williams gave evidence that defendant had shot a hen pheasant from his car on a public highway, and had no firearms license. The offence occurred on Sumas prairie.
